charcuterie

prosciutto

Prosciutto Di Parma

100% natural cured ham without any additives, preservatives, hormones, gluten or coloring agents, made in Emilia Romagna.

Aged 14 months: #231459, 1/16.5 lba
Aged 16 months: #231517, 1/16.5 lba*
Aged 24 months: #231519, 1/16.5 lba*

Prosciutto Di Parma

When sliced thin, it is rose-red in color with a lean-meat fragrance and sweet, inimitable flavor.

#090585, 1/18 lba

Prosciutto Di Parma

This Prosciutto Di Parma is delicious, and flavorful. Enjoy it on it's own or pair it with toasted, rustic breads. Prosciutto goes well with juicy summer melons or mozzarella cheese.

16 months - 1/17 lb, Leoncini #090565
24 months - 1/18 lba, Leoncini #090585

PARMACOTTO

Parmacotto is an Italian producer of fine meats based in the Parma area of Italy. The attention to detail separates us from other companies. Each product is curated with the fine eye of tradition and a sensitivity to the art of making fine charcuterie. In Parma, this is not just a type of meat, this is our history and part of who we are. We demand the best and think you should too.

Speck, Alto Adige 1/2 Cut

This format is produced by cutting the whole square Speck ham in half. Symmetry and uniformity are the result of the experience of our master butchers, who respect the meat's natural structure without pressing it. The absence of a rind will make it even easier and faster to cut tender slices that are all the same.

2/5lb, Recla, #090447

chubs & slices

Wagyu

What Sets Wagyu Apart

The difference of Japanese Wagyu begins with its definition. Wa (和) = Japanese, Gyu (牛) = Beef, beef cattle. So the word Wagyu literally translates to Japanese Beef. In most contexts where you see “wagyu,” the word is misused. Marketers oftentimes sell meat from certain American and Australian cattle as “wagyu” to boost its price, but such cattle have very little in common with their true Japanese counterparts. Japanese Wagyu is superior in taste, texture, and health benefits because of their genetics, rearing methods, vintage, and health benefits.

Wagyu Cuts:

Wagyu is carefully divided into a wide variety of cuts, each offering a unique texture and flavor profile that ensures consistency and elevates the dining experience. This meticulous approach allows chefs to showcase the subtle differences between cuts, unlocking new culinary possibilities. From the delicate tenderness of the tenderloin to the rich marbling of the ribeye or the intricate textures of lesser-known cuts, every piece of Wagyu tells its own story. Whether crafting a silky tartare, a perfectly seared rôti, or an innovative fusion dish, there's an ideal cut to match your vision. Exploring the full potential of Wagyu cuts and creative preparation techniques transforms each dish into a masterpiece, making the Wagyu body a true chef's wonderland.

Genetics:

Wagyu beef is renowned for its exceptional quality, shaped by unique rearing methods across Japan's diverse environments and meticulous care, with an average of just 54 cattle per farm. Its unparalleled marbling, known as “Shimofuri,” is the most intricate globally, creating a tender, silky texture and a flavor profile rich in sweet, nutty, and caramelized notes, complemented by fruity and buttery aromas. This is further enhanced by Wagyu's fat, which, due to a special gene, has a low melting point, making it melt effortlessly in the hand or mouth, showcasing its extraordinary delicacy.

Health Benefits:

Japanese Wagyu is highly regulated, with strict laws prohibiting growth hormones and limiting antibiotic use. It is rich in heart-healthy monounsaturated fatty acids (MUFA), particularly oleic acid, which is the same healthy fat found in olive oil. MUFAs help reduce bad LDL cholesterol while increasing good HDL cholesterol with minimal impact on total cholesterol. With 52.9% oleic acid, Japanese Wagyu contains 13.1%–20% more than Angus beef and even exceeds most vegetable oils.

Vintage:

At Wagyu Sommelier, “vintage” refers to a cow's age at processing, with older vintages offering richer flavor profiles but at higher costs and risks. While U.S. and Australian beef cattle are typically processed at 18–20 months, Japanese Wagyu often reaches 30–36 months, and sometimes over 40 months.
