

Fidlera Unified Data Platform Scorecard

Part of the Fidelra Readiness Framework (FTF™)

Domain-Level Scores

1

$$W_d = R_d \times w_d$$

Domain	Raw Score(0-100)	Weight	Weighted Contribution
Modernization	84.2	30%	25.26
Resilience (SQL Readiness)	70.0	20%	14.00
Automation Maturity	89.7	20%	17.94
Compliance	89.7	15%	13.46
Governance	89.7	15%	13.46
Total Weighted Score (Before Penalties)			84.12

Penalty Impacts

Penalties applied for high-risk findings that reduce modernization readiness.

Penalty Category	Domain	Total Penalty	Description
Legacy SQL Versions Unsupported Feature Sets Outdated Engine Configurations	Modernization	-10.5	SQL 2016 + unsupported CU levels across two regions, MAXDOP/MAX Memory
HA/DR Gaps Missing Auto-Failover on Secondary Region No Recent DR Validation	Resilience/ SQL Readiness	-3.0	No failover tests executed in last 12 months DR node not configured for automatic failover
Security Delegation Issues Missing Encryption-at-Rest Validation PII Data Exposed	Compliance	-2.25	Column level encryption missing, no TDE/AlwaysOn encrypted
No Quarterly Compliance Evidence Cycles	Governance	-2.25	No historical evidence library or proof of quarterly reviews
No Monitoring / alerting	Automation	-3.0	No tools / native monitoring
Total Penalties		-21.0	

Unified Score Calculation Formula

2

Total Weight Score (Before Penalties)

$$\text{Total Weighted Score} = \sum(W_d)$$

$$\text{Total Weighted Score} = (84.2 \times 0.30) + (70.0 \times 0.20) + (89.7 \times 0.20) + (89.7 \times 0.15) + (89.7 \times 0.15) = \mathbf{84.12}$$

Penalty Application

3

Penalties are applied after weighting, based on validated high-risk findings (Penalty caps applied per domain to prevent score distortion)

$$P_d = \min \left(\sum p_{d,i}, \text{Penalty Cap}_d \right)$$

$$\text{Total Weighted Score} = \sum(W_d)$$

Total Penalties =

$$\sum(\text{Applied Penalties}) = \mathbf{-21.0}$$

Unified Data Platform Score

4

$$\text{Unified Score} = \sum W_d - \sum P_d$$

$$\text{Final Unified Readiness Score} \\ \text{Unified Score} = 84.12 - 21.00$$

$$= \mathbf{63.12\%}$$

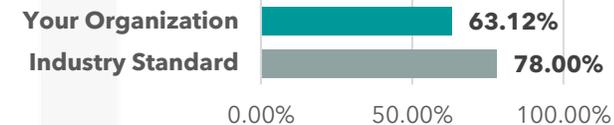

Indicates a viable platform with identifiable, fixable risks — not structural failure

Unified Score = Weighted readiness, risk-adjusted and penalty-capped.

Unified Score = a risk-adjusted readiness indicator, not a maturity average or compliance checklist.

Benchmark derived from aggregated enterprise data platform assessments (regulated industries, n≈8+)

Unified Score Vs Industry Standard

Stable with Targeted Gaps

Recommended Remediation Actions

5

Priority 1 — Mandatory (0–30 Days)

Upgrade all SQL 2016 to SQL 2022 / 2025
Implement AlwaysOn Encrypted / TDE
Implement DR failover and complete DR test

Priority 2 — Platform Improvements (30–60 Days)

Standardize automation for jobs, alerts, KPIs, uptime
Begin performance baselining for transactional queries
Follow recommended best practices for SQL environment

Priority 3 — Optimization (60–90 Days)

Tune long-running queries identified in early baselines.
Implement compression standards for OLTP workloads.
Introduce quarterly compliance + configuration evidence cycle.
