Other small pet visits	Dependent on service required

SERVICES

Group Dog Walks

This is our most popular option. Your dog would be walked in a small group allowing interaction, play and socialising with other dogs in a stimulating environment. Your dog will have to be friendly, not pull excessively on the lead, have good recall and not be aggressive to other dogs or humans. They will only be let off the lead (with your written permission) in a safe space and your dog will be on the lead to and from these places.

New dogs joining in with group walks may be initially walked individually to better understand their behaviour and general suitability for joining an existing group. If at any time we feel your dog is unsuitable for a group walk, you will be offered, where possible, our dog walking service on a 1:1 basis. Group walks are for 60 minutes.

1:1 Walks

Some dogs prefer the attention of human company more than they do the attention of their own kind and for these dogs we can offer our 1:1 walk. A 1:1 walk is also suitable for older, less mobile or nervous dogs. We can also re-enforce any training or commands you have been working on with your dog. This is a lead walk only service. A 1:1 walk is for 30 minutes.

Puppy Pop Ins or Home Visits

Suitable for new puppies where you want them to have a little attention when you cannot be there and is also great service for older dogs, who may not be up to the demands of a 1:1 or group walk but still need to be let out, relieve themselves and will benefit from some human company.

We will give your dog care and attention, play with them, allow them to stretch their legs and have cuddles and some love. We will give them fresh food and water if required and ensure they stretch their legs and relieve themselves. Puppy Pop Ins or Home Visits are for either 15 minutes or 30 minutes. You may choose to have 2 shorter visits per day.

Cat Visits

We will give your cat care and attention, engaging them in play and interaction if this is what they are happy with. Some cats enjoy human company more than others so you can let us know what is best for your loved one. If your cat is more independent, we will still check they are safe, have a clean litter tray and will provide fresh food and water. Cat visits will generally be for 15 minutes but you can book for 30 minutes if your cat needs it.

Small Pet Visits

If you are concerned about your small furry pet and home whilst you are away, and you would like someone trustworthy to check everything is okay whilst feeding your small pets, then this is the ideal service for you. Please feel free to discuss your requirements with us.

N.B. For your peace of mind we can arrange to text your mobile, should you so wish, to let you know everything is okay with your pet so you can continue with your day knowing your loved one is safe and happy.
