

NON-FIRE RATED DOOR SYSTEMS

ClimateGuard™ IS3000

Vertical Coiling Insulated Service Doors

ClimateGuard™ IS3000 insulated service doors are filled with thick foamed-in-place polyurethane that permanently bonds to both the interior and exterior slat panels of the curtain. ClimateGuard is offered in various models providing R-value ratings ranging from 6.25 to 9.30, calculated according to ASHRAE formula. Insulated service doors are available in primer painted galvanized steel, aluminum, and stainless steel, or can be powder coat finished to any color requirement. They are the ideal solution when energy conservation and protection against the elements is a primary consideration. When necessary these doors can be designed as self-opening assemblies to allow for egress.

This technology is the subject of US Patent No. 8,453,707.

IS3000

NON-FIRE RATED DOOR SYSTEMS

Service & Security Doors

McKEON offers a wide selection of non-fire rated custom service doors. These assemblies can be manufactured in literally any size or for any function including insulated and sound rated, with either solid or perforated slats. All of these slat configurations are available in 16, 18, 20 or 22 gauge. Finishes include McKEON galvanized standard sterling gray, custom powder coat of color as selected, stainless steel No. 4 polish or No. 8 mirror finish, anodized or powder-coat aluminum. Service doors can be oriented to any custom-fit scenario – vertical coiling, side acting, side coiling or horizontal coiling.
