RHS Solvent Recovery System

Description

CB Mills RHS Solvent Recovery System.
Model RHS-30. High Volume/ Low
Waste solvent recovery system reactor.

**RHS SOLVENT RECOVERY SYSTEM.
MODEL RHS-30 (37 GPH+)
Serial # 15186-000
Date: 06/2012
HP: 1.5
Volt: 460 Amp 60**

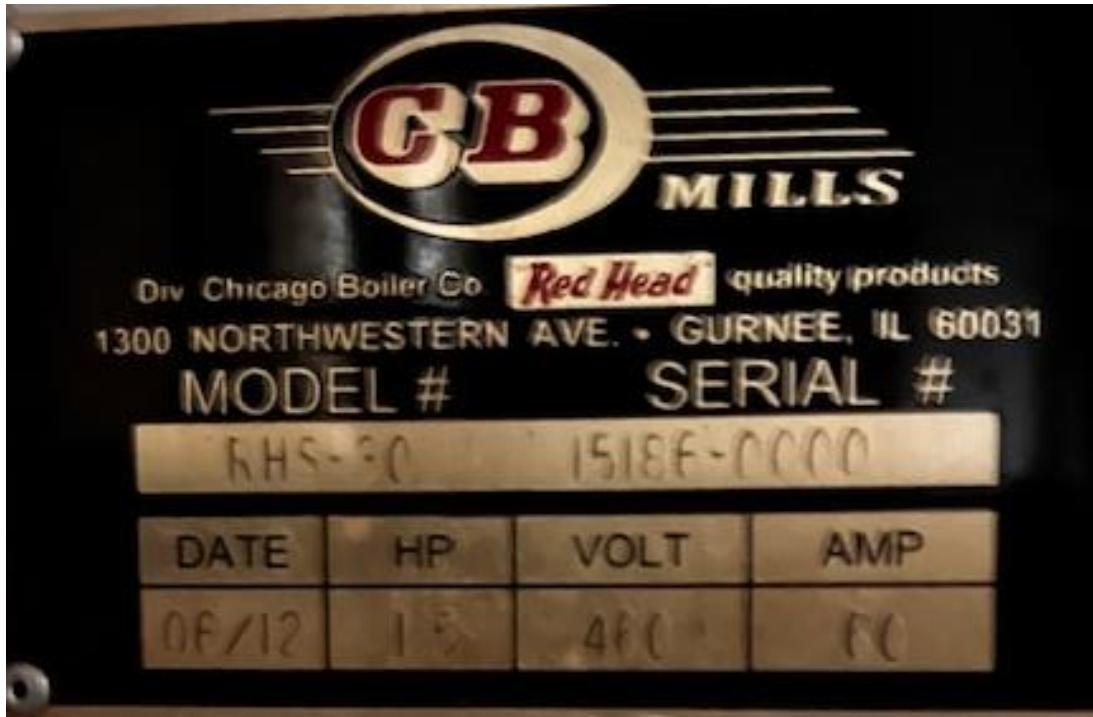

A capacity of 37 gallons per hour (GPH), a high-volume, low-waste system designed for continuous solvent recovery, utilizing PLC controls and thermal oil circulation for efficient distillation.

RHS Solvent Recovery System

Specs & Features

- Capacity: 15-35 gallons/hour.
- Systems distill virtually any solvent
- 304 Stainless steel polished interior
- Max Heating temperature is 225C.
- PTFE Food Safe mixing blades/wall scrapers.
- Thermal oil circulation 100 to 550 Degrees F.
- Distillation vessel eliminates carry-over
- Vacuum operation reduces energy use by requiring less heat
- Intrinsically safe Explosion Rated C1D1
- Auto fill and cycle; manual knife Gate Dump.
