Our parish census databases are, like most parishes, not up to date/accurate. This is in part due to people themselves not notifying us when there is a move, a death, or a child grows up and move away, or new people who don't register. This is in part due to people who come just for a single sacrament. And it's due in part to the time necessary to manage a large database system.

So while the adjacent information is not entirely accurate by number, it is a good representation by percentage of our entire Parish Family.
