# History at Home

A bespoke research service uncovering  
the story of your home.

Every house has a story:  
from its architectural beginnings to the people who once lived within  
its walls. History at Home uncovers the layers of your property's past &  
turns them into a beautifully designed keepsake.

This is also a great first step for anyone wishing to redesign their home.  
Narrative design is the process of creating a story around your interiors  
ensuring they connect the past with the present.

You'll receive expertly researched content written in a warm, narrative  
style, paired with elegant design layouts that reflect your home's era  
& personality.
