Our promise to our members is to offer, without agenda, impartial and competitive aircraft options suited to your specific needs, supported with tailored benefits to provide a bespoke package to each member.

WHO ARE WE?

Jet Members is a tailored private jet membership solution

Jet Members works on the common ideal that no two clients are the same - only linked perhaps by one commonality, to get the best option and the right price, tailored to their specific needs.

Jet Members was created for clients looking at purchasing a set amount of hours within Europe to use on private aircraft. Rather than pricing blindly, we look at the core elements which commonly affect the cost of your trips (such as the notice given, flight time, routings, length of stay, aircraft type) to provide a more accurate proposal, all without the humdrum of needing to initially connect with over keen salespeople (if you know you know).

ETHOS OF JET MEMBERS

Straight-talking with a personalised approach

Stepping away from the sterile corporate culture, our aim is to provide the needs and wants of each of our members precisely.

Consider if you will the same analogy as buying a suit. There are many mainstream vendors available, but nothing matches something that is individually 'one of kind' tailored...

In private aviation nobody wants to be treated like any other person in the line, nor be dependent on an app or artificial intelligence to deliver the service and we absolutely understand this. If you want total attention on your requirements, and not just being the generic fifth flight of the day, a more boutique company can provide you with that extra attention to your trip. We freely admit from the outset we are not, nor trying, to be the largest private aviation company in the world. For us size is not a concern, instead, it is to be great at what we do, living by the phrase 'quality over quantity' every time.

BUILD YOUR OWN MEMBERSHIP PACKAGE

Tailor-made in accordance to your needs

①

Protected Hourly Rates

Starting from as low as 10 hours, protect your cost of flying with a capped hourly rate tailored to your specific needs

②

Pre-paid Fund Accounts

Suitable for clients travelling 2+ times in a year, non-hourly market prices provided

③

Fly Now Requests

'Pay As You Go' booking arrangements, ideal for one-off requests

MEMBERSHIP OPTION ①

Protected Hourly Rates

Design your own tailored hourly rate program suited to your needs and receive real-time market prices, with the safeguard of a pre-agreed maximum flying cost per hour.

Perfect for members looking to travel 3+ times a year. Members use their savings earned for additional flying time, upgrades, and ancillary services.

Your Aircraft Choice

HELICOPTER

Rotor wing options ranging from 4 - 9 seats. Perfect for shorter hops or accessing private site locations. Most models provided by Jet Members will be twin engine models unless stated.

TURBOPROP

Fixed wing propellor options ranging from 4 - 9 seats. Typically more cost effective on shorter journeys up to 90 minutes.

VERY LIGHT JET

Entry level aircraft suitable for up to 4 passengers, for flights typically less than 2 hours. Basic amenities such as snack catering is provided, and not all models have enclosed lavatories.

LIGHT JET

Suitable for up to 8 passengers, generally wider and taller than Very Light Jets (non-standing), with a small enclosed lavatory as standard. Cold catering options provided.

SUPER LIGHT JET

Suitable for up to 6 - 8 passengers, with increased cabin headroom and width than Light Jets, with optional flight attendant services. Suitable for flights up to or around 3 hours.

MIDSIZED JET

Suitable for up to 8 passengers, with a stand up cabin. Flight attendant services provided as standard.

Your Aircraft Choice

SUPER MIDSIZED JET

Suitable for up to 8 - 12 passengers, with increased overall cabin space and flat floor typically expected throughout. Improved aircraft range for trips up to 5 hours.

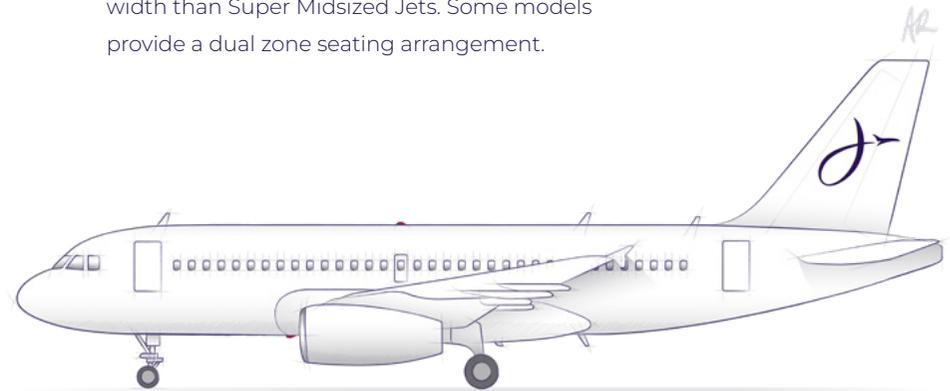

ULTRA LONG RANGE

Suitable for up to 14 passengers, typically with 12+ flight hour durations. Most options provide a minimum of 2 - 3 different seating areas with enclosed staterooms, and also include a forward rest area for additional crew (if needed).

HEAVY JET

Suitable for up to 14 passengers, for direct flights up to 6 - 8 hours. Increased cabin height and width than Super Midsize Jets. Some models provide a dual zone seating arrangement.

VIP AIRLINER

Derived from narrow bodied airliners, these seat up to 19 - 30 passengers depending on the specific configuration, with flight durations up to 10 - 12 hours.

A Better Buying Position

As markets change over time, so do the offerings they provide, in a variety of ways:

- ✈ Airline Hourly Rate Adjustments
- ✈ New Operators to the Market
- ✈ New Aircraft to the Market
- ✈ Change of Aircraft Ownership / Management

Whether you have committed to a traditional hourly programme or perhaps invested into a full / fractional ownership, whichever option you may have had initially will undoubtedly become outdated in time.

With our membership you can easily roll with the changes to the market, without being tied to any specific aircraft or operator. Our members can take advantage of airline rate discounts, new aircraft options with flexibility and quick confirmation, as well as the ability to move easily around the market. And with our membership you can choose to close your account at any time, so never be in doubt of having any hours remaining unused.

Compliance, Service & Safety

At Jet Members we provide the following:

- **Argus Safety Approved Operators** which hold a valid Air Operators Certificate, plus **Insurance for Commercial Operations**, issued by appropriate governing bodies such as the Civil Aviation Authority
- Private **Account Manager** to oversee your enquiry
- Limits on the **Maximum Age of Aircraft** provided in our quotations
(unlike other private jet companies it's our standard procedure to only offer aircraft manufactured younger than 2004)
- **Service Standard Reports**, which include pre-flight spot checks on crew and cabin preparations, flight monitoring services and post flight crew reports
