LED Light Therapy

Unlock the secrets to radiant skin and holistic wellness with our innovative LED light therapy treatments for the face and body.

How it Works

This treatment is among a favorite of estheticians and clients alike due to its calming effects and ability to be provided simultaneously with other treatments.

It is completely non-invasive, natural, and relaxing to patients with all different kinds of skin. LED light therapy is a miraculous treatment by soothing skin, eliminating fine lines and wrinkles, and supporting collagen and elastin production.

Different wavelengths represent different colors of the visible spectrum, and these colors each have their own unique healing properties.

LED Light Therapy

Our comprehensive LED facial treatment feature **4 Therapeutic LED light colors**, each boasting distinct healing properties customized to address your skin's specific requirements. Whether combating acne-causing bacteria, alleviating inflammation, or stimulating collagen production, LED Light Therapy offers a versatile solution suitable for all skin types.

Properties of Each LED Light:

Red Light: Improves blood flow and gives the skin a much younger look and feel.

Blue Light: Targets acne-causing bacteria. reduces inflammation and redness.

Yellow Light: Boosts lymphatic flow, increases circulation, and reduces redness and swelling.

Near-Infrared Light: Promotes deep healing and cellular repair and enhances skin firmness and overall wellness.

Before and After Results

Most patients express satisfaction with visible results that can often be observed after just one treatment!
