

Oxygen + LED Light Therapy Facial

Advanced Oxygen Infusion & Light Therapy for Radiant Skin

Experience the ultimate skin rejuvenation treatment with oxygen infusion therapy combined with LED light therapy. This advanced facial experience helps hydrate, refresh, and revitalize the skin while supporting a healthier-looking, more radiant complexion.

The Oxygen + LED Dome Treatment combines the benefits of oxygen therapy and customizable LED light wavelengths to create a relaxing, non-invasive treatment suitable for a variety of skin types and concerns.

What Is Oxygen Infusion Therapy?

Oxygen infusion therapy is a refreshing skincare treatment designed to deliver hydration and nourishing ingredients to the skin while helping improve the overall appearance of the complexion.

This treatment helps leave the skin looking refreshed, hydrated, and glowing while enhancing the benefits of professional skincare products.

Benefits of Oxygen Infusion Therapy

- ✦✦ Helps hydrate and nourish the skin
 - ✦✦ Enhances the appearance of skin radiance
 - ✦✦ Supports a fresh, dewy-looking glow
 - ✦✦ Helps improve the appearance of tired, dull skin
 - ✦✦ Enhances the overall facial experience
-

What Is LED Light Therapy?

LED (Light Emitting Diode) Therapy uses different wavelengths of light to target specific skin concerns and support overall skin health.

Each color of light works differently to help improve the appearance of common concerns such as visible redness, uneven tone, blemishes, dullness, and signs of aging.

Your skincare professional can customize your treatment by selecting the best light color for your individual skin goals.

LED Light Therapy Colors & Benefits

Red Light Therapy

Skin Renewal & Rejuvenation Support

Red light therapy is commonly used to support a healthier-looking complexion and improve the appearance of signs of aging.

Benefits include:

- ✓ Helps promote a radiant-looking complexion
 - ✓ Supports the appearance of firmer, smoother skin
 - ✓ Helps improve the look of fine lines and wrinkles
 - ✓ Supports collagen production
 - ✓ Helps restore glow to dull-looking skin
-

Blue Light Therapy

Clearer-Looking Skin Support

Blue light therapy is commonly used for clients looking to support clearer-looking skin and reduce the appearance of blemishes.

Benefits include:

- ✓ Helps improve the appearance of acne-prone skin
 - ✓ Supports a clearer-looking complexion
 - ✓ Helps calm the appearance of redness
 - ✓ Supports balanced-looking skin
-

Green Light Therapy

Brightening & Skin Balance

Green light therapy helps support a more even-looking complexion and is often chosen for clients concerned with uneven tone.

Benefits include:

- ✓ Helps improve the appearance of discoloration
 - ✓ Supports a brighter-looking complexion
 - ✓ Helps calm the appearance of redness
 - ✓ Promotes a balanced, radiant glow
-

Yellow Light Therapy

Calming & Skin Rejuvenation

Yellow light therapy is ideal for supporting sensitive or stressed-looking skin while promoting a refreshed appearance.

Benefits include:

- ✓ Helps soothe the appearance of redness
 - ✓ Supports skin rejuvenation
 - ✓ Helps improve overall skin radiance
 - ✓ Promotes a smoother-looking complexion
-

What To Expect During Your Treatment

Your treatment begins with a customized approach based on your skin type and goals.

During your session, your skincare professional will use oxygen infusion therapy and selected LED light wavelengths to provide a relaxing, rejuvenating experience.

The treatment is comfortable, gentle, and requires no downtime, making it an excellent addition to your skincare routine.

Is Oxygen + LED Light Therapy Right For You?

This treatment is ideal for clients looking to support:

- ✓ Dry or dehydrated-looking skin
 - ✓ Dull or tired complexion
 - ✓ Uneven-looking skin tone
 - ✓ Visible redness
 - ✓ Blemish-prone skin
 - ✓ Signs of aging
 - ✓ Overall skin maintenance and rejuvenation
-

Why Choose Oxygen + LED Light Therapy?

This advanced facial combines two powerful skincare technologies to help support a healthier-looking complexion.

Oxygen infusion helps refresh and hydrate the skin, while LED light therapy provides customizable support for your unique skincare concerns — leaving your skin looking radiant, refreshed, and renewed.
