

# WHAT GOES INTO THE COST OF MY ORTHOSIS/PROSTHESIS?

- The appropriate design and precise fitting of your orthosis or prosthesis requires the skills of a highly trained practitioner. Orthotists and Prosthetists have completed a minimum of six years of higher education, and a one-year residency for each discipline. In addition, all our Practitioners are certified by the American Board of Certification in Orthotics & Prosthetics (ABC), the Board for Orthotist and Prosthetist (BOC) or are pursuing certification.
- Continuing Education for Practitioners and Technicians, and membership in various professional organizations keep our staff current on the latest technology in our field.
- As a clinic and a fabrication lab, our costs include specialized machinery, materials and supplies for fabrication, as well as ordinary office overhead. There is also a growing cost associated with compliance with a variety of federal and state regulations.

**Thank you for allowing our family to care for you and your family!!**
