## Giving Purpose to Repurposed Computers.

Through technology and education we give youth a brighter future!

### We need your old computers!

With the digital divide amongst underserved areas a national problem, we need help from corporations like yours more than ever to help us fulfill our mission **to provide technology access and education to underserved youth.**

### Computer Adoption and Drive-Thru

In this program reconditioned corporate computers are distributed to families without access to devices at home through a computer drive-thru distribution. Computers are free and include 2-years of free tech support.

### The Need

**41%**  
of our families  
still lack access  
to a computer  
at home

**58%**  
of all stem jobs  
on the market  
are computer  
science jobs

**500,000+**  
current U.S. job  
openings are in  
computer  
science

**70%**  
of all 6th-8th  
graders need  
a computer  
for homework

### Donate Your Computer Today!

Computer donations help our resources go further so that we can bring technology access to more people in the communities we serve. We accept both individual and corporate donations. Ask your company if they have retired equipment available.

# Our Programs

We help children, and young adults maximize their potential through programs which strengthen their computer and technology literacy. **All programs include a [reconditioned computer to keep](#).**

## Early Adopters

### Elementary School:

Students become astronauts and learn how technology can be used to help enhance a story by designing their own virtual reality world using CoSpaces Pro and bring their own creations to life using the Scratch and MakeCode programming languages.

## STEAM Team

### Middle School:

Students put on their detective hats and use STEAM technology to solve the mystery of an art heist. Students will engage with a variety of different hardware and software to learn how tech is used to solve real world problems.

## Learn2Earn

### High School:

Students learn to code, program, and will get hands-on with networks and computer hardware.

Each participant receives a refurbished laptop computer to keep.

## IT Pathways

### Ages 16-26:

Opportunity youth participate in an internationally recognized Cisco training course.

Participants are awarded certificates of completion and have the opportunity to take the Cisco certification exam.
