Here are some extraordinary benefits of outdoor play:

Babies who consistently play in nature  
 SHARE BETTER!  
 Outdoor play will give baby a MORE PLEASANT PERSONALITY!  
 \* Babies who play in the elements are much more  
 WORLDLY.  
 \* Exploring with the endless possibilities which is available in the outdoors leads to GREAT THINKERS!

Try making regular play times in the great outdoors. Being in wide opening spaces will allow your child to release energy and explore nature's endless possibilities – and sometimes that's just the cure.

**Our babies deserve NATURE. Here are some creative ways to explore the outdoors:**

Get off of the cement! Get dirty; get the earth in your hands and on your bare feet!

\* Let your baby sit in the garden with you as you weed and pick veggies. As baby is older, let them help you in digging small holes, and in planting seeds.

\* When the world is so vast, the sky so open, just a walk around the block can go on FOREVER for a toddler.
