

This architectural section drawing illustrates the vertical structure of a building, including the foundation, ground floor, first floor, and roof. The drawing is oriented with the building's length along the horizontal axis and its height along the vertical axis. Key features include:

- Foundation:** The base of the building is supported by a foundation system, with a level marked at 0.00.
- Ground Floor:** The ground floor is shown with a height of 3.50. It contains a large window on the left and a large window on the right. The floor level is marked at 3.50.
- First Floor:** The first floor is shown with a height of 7.70. It contains a large window on the left and a large window on the right. The floor level is marked at 7.70.
- Roof:** The roof is shown with a height of 11.90. It features a central gabled section. The roof level is marked at 11.90.
- Dimensions:** The drawing includes various dimensions for structural elements, such as wall thicknesses, window heights, and floor-to-floor heights. For example, the height from the ground floor to the first floor is 3.50, and the height from the first floor to the roof is 4.20.
- Grid Lines:** The drawing is divided into sections by vertical grid lines, labeled 1 through 7 at the top.
- Labels:** The drawing includes labels for various structural elements, such as "Roof", "First Floor", "Ground Floor", and "Foundation".
