

Hej! I'm Pedro and I'm writing this letter to tell you about myself and my interests about this exchange I'm going to do.

First, I'll explain you why I chose Denmark as my destination. Honestly, before watching the different countries where I could do my exchange, I didn't even know that Denmark was going to be my chosen country, but when I started to search on the internet about the lifestyle they have and what a spectacular country it is, besides, it fit incredibly well with my personality and interests, I knew it was perfect for me.

My main interest of this exchange is the fact of being completely by my own in a country which for me is new, I want to know what the challenge is like and in the process, of course, meet people, make friends, try new meals, adapt to a new routine, and I love the idea of learning a new language. In addition, I'd really like to keep training basketball as I do here in Argentina, and going to the gym too, but I also want to try new things/activities that don't exist here or maybe they aren't mentioned that much, so I'm completely open to trying new things.

When I come back home, I'd like to put the things I have learned into my daily routine, so I hope I'll be a better person, both mentally (more mature) and socially.

About my free time, I always use it to do homework/projects for school, but when I finish them I usually play basketball in my garden, bake cakes or just spend time with my family watching movies and having tea, I love simple plans.

Talking about school, I have always been one of the best students in a class of almost 50 in total. I take exams and projects submissions very seriously, studying a lot and giving my best, which always gave me good results. I personally like most subjects like Physics, Chemistry and Programming, but I also enjoy P.E. classes (because I love doing sport, which makes me very good at them) and History too.

My parents are separated, so I have two different houses. At my father's house I share my bedroom with my sister, Trini, who has the same age as me. I love it because it has an awesome garden when I have my own small football pitch and a basketball court, and besides that I can meet my friends more easily because they live near to me.

At my mother's house things change, because it is quite far from the other house and the school I attend (about 15 minutes) but I have no problems with the transport, because my mother drives me to school, and when I leave school I just catch the bus and come back by my own. Of course that I also love that house, it's bigger than the other and a place outside the house where I meet my family at weekends. A fact I love about this house is my bedroom, which I don't share with my sister, so it's the place where I always do my homework, and I make sure it's always tidy and clean.

My interests and achievements are quite a lot, but on the side of the interests, I would highlight my responsibility with school and basketball, because I always look for improving my skills to be every day better at what I do, and besides of that, obviously, I care a lot about my friends and family, and I always want to see them happy and spend enjoyable time with them.

Something I am really interested in is robotics, I have it as a subject at school, and in fact, I recently won a national competition in a prestigious university of the state where I live called ONIET, where me and three more friends had to build from 0 an automatic waste sorting robot, reason why we won the first place.

I have already travelled to several countries for holidays, including the United States, where I went to parks like Disneyworld and Universal in Orlando, and also visited the beaches of Miami. I travelled to Bahamas, Brazil (more times than the others), Paraguay, Bolivia, etc. Besides that, I did lots of travels in Argentina, visiting different states by car.

About my personal tastes with food, there's not a single meal I don't like, I'm always opened to trying "strange" food for me or eating whatever we have at home, it isn't a problem for me. Talking about animals, I actually love them, in fact I have three dogs in my mother's house and I love spending time and playing with them, so I'm used to living with dogs.

I'd like to talk about what are for me my "strong points". I consider myself as a funny, kind and very strong person (mentally speaking) highlighting my leadership and good performance in everything I set as a goal.

To finish, I'd say that my main goal of the exchange is to fill my life with new experiences, friends and skills, visit lots of places (I love travelling) and above all to enjoy every day I'm there to the fullest.

Finally, I'd like to thank you for taking the time to read this letter and I really appreciate you opening the doors of your home to me. I am so excited about this exchange and can't wait to meet you all! Vi ses!
