UK Nature Markets Dialogue

Environmental Market Integrity UK

Market Rules Workshop

Making it easier to participate with confidence in UK environmental markets.

Streamlined governance. Independent oversight. Clear rules.

Date	Time	Location	Register
Monday 23 November	10:30 AM - 12:30 PM	Online	llswohe9.paperform.co

Help shape clear, consistent and proportionate Market Rules for organisations and individuals carrying out different environmental market functions.

Workshop facilitated by Ecosystems Knowledge Network

About the environmental markets governance scheme (the Scheme)

The Scheme is being developed with funding from Defra to provide independent oversight of environmental market integrity in the UK. It aims to build confidence that environmental improvements are real and additional, make market participation easier, fairer and more cost-effective, and build on existing infrastructure, expertise and innovation.

The role of the Market Rules

The Market Rules will set out what participants need to do to comply with the principles and standards that apply to the Environmental Market Functions they carry out. Subject to approval from Defra, the Market Rules will apply to the operation of the Scheme from mid-2027.

Project development | **Benefit quantification** | **Credit generation** | **Market trading** | **Project delivery**

At the workshop

- **The role of the Market Rules in the Scheme**
- **How the Rules build on existing principles and standards**
- **The proposed structure and content of the Rules**
- **Timeline and process for developing the Rules**
- **Next steps**

Who should attend

People who are, or are interested in, carrying out one or more market functions.
