A world of challenges, emotions, and collecting

Entering the world of NARUTO Mythos TCG: Shinobi Shiren means experiencing strategy, collecting, and the excitement of the most iconic ninja battles. The set introduces exclusive Studio Pierrot artworks and unreleased illustrations revealed to the public for the very first time. At the peak of the collection are three Legendary Gold cards, crafted with genuine 22-karat gold foil and limited to 1,500 serialized copies each. A prestigious collection where every card becomes a new fragment of the NARUTO legend.

Card numbering

The Booster Pack collection of NARUTO Mythos Trading Card Game: Shinobi Shiren consists of 150 cards, each available in a range of different rarities that expand both gameplay and the collecting experience. The cards are subdivided as follows:

- ✦ **Common (55) + Uncommon (55):** 1/140 → 110/140.
Available in FullArt, and Holographic variants. Each booster pack contains 4 C, 3 UC and 1 Holographic card among the Common or Uncommon cards.
- ✦ **Rare (30):** 111/140 → 140/140. Holographic cards that are powerful and visually appealing, often combining to form a single illustration when placed side by side. You'll find one in every pack.
- ✦ **Rare ART (22+4):** Variants of the Rare cards feature micro-engravings. They share the same numbering as their corresponding Rare cards but with an "A" suffix after the fraction (e.g., 111/140 A).
- ✦ **Special (10):** Variants of Rare and Secret cards retain the same numbering, with the addition of the "V" suffix.
- ✦ **Shinobi (10):** Variants of Rare cards featuring exclusive artwork retain the same numbering, with the addition of the "A" suffix.
- ✦ **Chibi (9):** Variants of Rare cards retain the same numbering, with the addition of the "V" suffix. You find one in every box.
- ✦ **POP (4):** Variants of Rare cards, each produced in a limited number of individually serialized copies, retain the same numbering with the addition of the "V" suffix.
- ✦ **Secret (10+4):** Numbered beyond the main collection, 141/140 → 150/140. There are 4 ultra-rare Serialized Secret Variants, limited to individually serialized copies each.
- ✦ **Mission (10):** Widescreen-oriented cards with their own independent progressive numbering (1, 2, 3...10). You'll find one in every pack, available in both standard and holographic versions.
- ✦ **Legendary (3):** limited-edition card, serialized like a work of art n/x000 (e.g., 1/1000 → 1000/1000).

There are also cards outside the main collection, available inside special packs, blisters, official events, and tournaments. These special cards are called Mythos and are divided into two categories:

- ✦ **Mythos Exclusive Unreleased:** completely new cards that continue the progressive numbering starting from 151/140.
- ✦ **Mythos variant:** variants of cards already belonging to the main collection, which retain the numbering of their previous card.

Exclusive Artwork

EXCLUSIVE
ARTWORK

Starting with Shinobi Shiren, stunning original artworks created exclusively by Studio Pierrot mark their debut, marked by the distinctive crown emblem.

Common and Uncommon

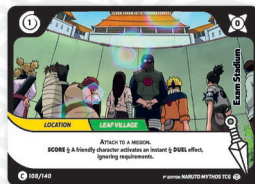

Common and Uncommon cards form the foundation of the NARUTO Mythos TCG collection, combining essential gameplay elements with a variety of collectible finishes. Common Character cards are available in FullArt and holographic versions. The set also introduces Attachment cards, available as both Common and Uncommon. Attachments can be equipped to Character or Mission cards to enhance their effects and expand strategic possibilities. Each Attachment is available in both standard and holographic.

Mission

Mission Cards form the narrative and strategic core of every match. Played in progressive order from Rank D to A, they influence deck-building and each player's strategy. Each Mission is available with two different artwork variants and features premium gold details, rainbow reflections, and special varnishes that add depth and a three-dimensional effect. Shinobi Shiren also introduces Mission Attachments, available in standard and holographic versions, which can be added to Mission Cards to enhance their effects and expand strategic possibilities.

Mission MISSION

Rare

The Rare Cards take the collection to a higher level, standing out for their rainbow holographic effect combined with a 3D finish that enhances graphic details, where the image dominates in all its expressive power. The Rares are powerful cards, designed to embody value and rarity, and are essential for building a winning deck.

They are created in compositions that, once collected and placed side by side, form continuous and evocative scenes, turning the binder into a visually rich and captivating. These cards unite the charm of gameplay with the joy of collecting.

RARE

Special • NEW RARITY

Special cards are exclusive variants of selected Rare cards, created to transform iconic characters and moments into premium collectible pieces. Each card features a full-art illustration enhanced by holographic brushstrokes that flow across selected areas, creating shifting reflections and adding energy to the composition. Fine holographic lines and engraved details further highlight key elements of the artwork.

Golden accents and intricate textured inlays enrich the background with depth and visual complexity, while special varnishes create a refined three-dimensional and tactile effect.

The combination of immersive artwork, holographic brushstrokes, gold finishes, and layered textures makes Special cards immediately recognizable and among the most visually striking cards in the collection.

SPECIAL

Chibi • NEW RARITY

Chibi cards reinterpret selected characters in a playful SD style, with exaggerated proportions, expressive poses, and a distinctive visual identity that brings a lighter and more dynamic dimension to the collection. Their illustrations are enhanced by a vivid rainbow holographic effect that creates constantly changing reflections across the surface. Serigraphic details add texture and depth to elements of the artwork, while premium gold finishes highlight key features and decorative accents, enriching the composition with brilliance and contrast. The combination of stylized artwork, layered effects, tactile textures, and metallic details makes every Chibi card immediately recognizable. Colorful, expressive, and highly collectible, these cards offer a unique reinterpretation of the NARUTO characters and stand out as some of the most original pieces in the collection. Exclusive to Box Toppers and official events, Chibi cards are not available in booster packs, making them highly desirable collector's items.

Chibi CHIBI

Shinobi • NEW RARITY

Shinobi cards are a special group of ten cards, created to celebrate some of the most iconic duels of the Chunin Exams. They are arranged in pairs, and when placed side by side, each pair reconstructs a famous battle scene, giving the collection a stronger visual and narrative impact. One of their most distinctive features is the artwork: every Shinobi card showcases an illustration created exclusively for this rarity and identified by the Crown icon, making these cards truly unique within the set. This original artistic approach gives them a special identity and makes them particularly valuable for collectors.

Their premium finish is enhanced by holographic effects, gold details, and intricate inlaid textures that enrich the composition and add depth to the artwork. With their exclusive illustrations, paired structure, and refined finishes, Shinobi cards stand out as one of the most original and collectible additions to Shinobi Shiren.

Rare ART

Rare ART cards are special variants of Rare cards, designed to fully enhance each character's identity and transform the artwork into a true collectible portrait. They are immediately recognizable by two distinctive features: a holographic effect that adds brilliance and depth, and intricate micro-engraving that enriches the surface with refined textures and tactile raised details. Rare ART cards also feature the letter "A" next to the card number at the bottom.

Among them, four exclusive Rare ART cards are individually serialized, making them even rarer and more prestigious collector's pieces. With their combination of detailed artwork, premium finishes, and limited availability, Rare ART cards add elegance, exclusivity, and uniqueness to any collection.

Mythos

Mythos cards are special cards outside the main collection and cannot be purchased individually. They are available through selected products, exclusive events, official initiatives, and Organized Play tournaments held at authorized stores through the platform.

Like Rare ART cards, they feature unique illustrations, holographic effects, and refined micro-engravings. Mythos cards may introduce entirely new designs or reinterpret iconic cards, characters, and scenes from the NARUTO universe, with exclusive artwork created specifically for this rarity.

Secret

The ten Secret cards represent one of the highest levels of rarity in Shinobi Shiren. They combine an abstract triangular holographic pattern with an exclusive gold finish, creating striking reflections that enhance the artwork and make each card immediately recognizable.

Their limited availability and low pull rate make them highly sought-after collector's pieces, designed to stand out for their brilliance, prestige, and exclusivity.

Four Secret cards are also available as individually serialized Variants, with only 400 copies produced for each card. Featuring vivid color accents and an embossed serigraphic texture, these special versions add depth, shine, and a refined tactile finish, making them some of the most prestigious cards in the entire collection.

Secret SECRET

POP • NEW RARITY

POP cards are a brand-new rarity introduced in Shinobi Shiren, limited to just four exclusive designs and produced in only 300 individually serialized copies each. Each card is printed on holographic stock with a lenticular texture, creating dynamic reflections and a striking visual impact across the artwork. A premium gold frame surrounds the limited-edition numbering, emphasizing the card's exclusivity and collectible value. Intricate inlaid textures enhance selected areas of the design, while the layered construction adds depth and gives each card a distinctive premium appearance.

With their unique artwork, elaborate finishes, and extremely limited print run, POP cards represent one of the most innovative and sought-after additions to the Shinobi Shiren collection.

POP POP

Legendary

The Legendary Gold cards represent the most prestigious creations in the entire collection. Shinobi Shiren features three exclusive cards, each crafted with genuine 22-karat gold foil and enhanced by precision micro-engravings that intensify their brilliance, texture, and depth.

Each Legendary Gold card is produced in a strictly limited run of only 1,500 individually serialized copies, combining exceptional rarity with refined technical craftsmanship. Their precious materials and elaborate finishes transform every card into a true collector's masterpiece.

The gold foil creates rich reflections across the surface, while the engraved details emphasize the characters and the key elements of the composition, enhancing both the visual impact and the premium tactile quality. Unlike standard cards, Legendary Gold cards do not follow the regular set numbering, further emphasizing their unique and prestigious status. More than collectible cards, they are icons of the NARUTO Mythos TCG: rare treasures of gold and light, created to become the centerpiece of any collection.

Legendary LEGENDARY
