

Franklin County Building Permit Information and Process

Building Inspector

Randy Henrie

208-221-6149

1. A Building Permit must be obtained before beginning construction.
2. Permit application can be obtained at the Building Inspectors office or by going online to franklincountyidaho.org
3. Failure to obtain a Building Permit prior to construction will result in a fine double the amount of the Permit fee.
4. All structures exceeding 200 square feet must have a Permit.
5. Eligible building Lot. All land in the county is zoned agriculture and must be changed to become a building lot. Research the history of your property back to June 1993 to see if the parcel has been split or broken off another parcel. If it has contact the Planning and Zoning Administrator Randy Henrie to see what the process would be to get it changed into a building lot. If you are already in an approved subdivision a copy of you deed will be required.
6. For a Residential Permit the following is required:
 - a. A Septic Permit is required before you can obtain a building permit. Septic Permits are available at the Southeastern Health Department located at 42 West 1st South.
 - b. A Copy of your Deed.
 - c. Building plans (see attached) PDF emailed to plans@fcidaho.us
 - d. Signature Checklist (see attached) You will need an Address Verification form prior to getting signatures. Call 208-221-6149 For Appointment.
 - e. Building Permit Application.
All forms can be submitted to the building inspector's office or emailed to plans@fcidaho.us
7. The building Inspector will review plans and assess an amount for your permit based on the value of your home. Building Permit fee is 1% of the assessed value. You will be notified when you permit is ready.

Plan Submittal List

Email a PDF of your plans to plans@fcidaho.us

1. Site Plan:

Drawn to scale showing the shape of the lot and set back dimensions from all sides of the structure. Also driveway and any other structures.

2. Foundation Plan:

Drawn to ¼" scale showing all dimensions, footing size, wall size, and all interior footings and piers. Also identifying whether it is a basement, crawl space, or slab-on-grade. Show vent and knock out locations.

3. Floor Plans:

Drawn to ¼" Scale showing all dimensions, each room Labeled, all windows and door locations and size, ceiling height, all plumbing and appliance location, Attic and crawlspace access, cabinet location, decks and patios, and bearing wall identified. The more info the better.

4. Slice Plan:

Drawn to scale showing dimensions and identifying footing, foundation, rebar location, final grade, plate, floor joist, floor, wall assembly, wall coverings, wall heights, insulation location and R values, trusses, roof coverings and underlayment, and roof pitch.

5. Elevation Plans:

Drawn to scale showing all four side of the home. Also showing all exterior finishes, roof pitch, and window elevations.

6. Electrical Plan:

Drawn to scale showing all lighting, switches, outlets, and meter locations. Also inter-connected smoke and carbon monoxide detectors.

7. Roof Plan: If roof is hand built design plans required.

The permit holder must notify the Building Inspector when work is ready to be inspected. Call the Building Inspector between 9 am and 5 pm Monday - Friday at 221-6149 for an appointment giving a 24 - hour notice.

Required Inspections

1. Footing / Setback Inspection

- A. Excavation to proper depth (30" below final grade)
- B. Excavation must be a minimum of 80' from the center of the County road or 50' from the fence, whichever is furthest.
- C. Rebar must be in place in the footing forms, tied and lifted off the ground (approximately 3") Also, insure the UFER electrical ground is in place.
- D. There must be no frost in the ground.
- E. Set rebar dowels 24" on center after concrete is poured.

2. Foundation Inspection

- A. Forms in place, rebar in position both horizontal and vertical (24" o.c.) Any blockouts in place.
- B. Cold joints must be doweled.

3. Framing / Mechanical Inspection

- A. Sheathing inspection (before the house-wrap is applied)
- B. To be made after the roof, all framing, fire blocking and bracing are in place, windows in place (before insulation).
- C. Rough electrical, plumbing are in place and inspected.
- D. Rough mechanical (ducts, flues, appliances, etc.) are in place.

4. Sheetrock Inspection

- A. After sheetrock is installed before taping.
