Certificate II in Engineering

12 Month Course - Competency Based Completion

Learn the skills and knowledge required to engage in employment within the engineering/manufacturing industry.

This qualification is suited for individuals who are already employed within the engineering or manufacturing industry, those who are formally engaged in a traineeship or those who are unemployed.

Training involves time both within a work place or simulated work environment and also within BGT Jobs & Training Ballarat Skills Centre for training and assessment.

Learning Outcomes:

- Contribute to the health and safety of the workplace
- Interpret technical drawings
- Perform mechanical cutting, computation and welding
- Perform gas metal Arc Welding and manual Metal Arc Welding
- Application of quality systems and procedures
- Use of a range of mechanical and manual tools
- Working independently as well as part of a team in an engineering environment

Government funding may be available. Eligibility criteria applies.
