Your Signage Solution

Outstanding signage backed by Australian-made manufacturing

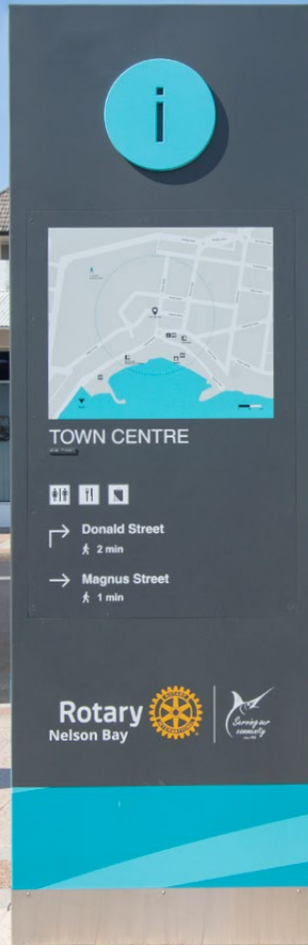

- Australian Made
- Premium durable materials
- Quality LED screens
- 10-year warranty on sign structures
- 5-year warranty on LEDs and lighting, extendable

Materials

All signage in this catalogue is designed and manufactured in Australia using high-quality, durable materials. Marine-grade aluminium provides strength and corrosion resistance, while exterior-grade paints and premium quality vinyl ensure a lasting finish. All graphics are protected with a UV over-laminate or sprayed with an anti-graffiti coating. Other materials include ACM for flat cut panels and durable acrylic for add-on components.

Assembled and supported right here in Australia, you'll never have to wonder where to turn for support. LED displays are high-resolution and deliver exceptional quality. Web-based software makes updating messages easy from any PC or mobile device. Energy-efficient technology, 4G-5G connectivity, and weatherproof construction ensure reliable performance.

For safety in extreme weather conditions all posts, footings, and hanging systems are engineered and fabricated to meet AS 1170.2 the Australian Standard for wind loads.
