

Tree Action Plans

WHAT IS AN ACTION PLAN?

Step 1 - We create a detailed GIS based tree map.

Step 2 - All trees are assessed for conflict or defect that needs to be corrected with pruning or removal. With this information an Action Plan is created.

Step 3 - A Summary Report accompanies our Action Plan, summarizing what is suggested and why.

Step 4 - Once the Action Plan and Summary Report are reviewed and understood by board and manager, we schedule and conduct a pre-bid walk with your selected service provider(s).

Step 5 - The bids are submitted back to the manager and board for review. Since the bids are based on *TreeLife's* Action Plan, all trees, counts and objectives are the same.

Step 6 - Once the work is awarded, we are informed of who and when they start. When they are complete, we inspect all of the work. Either a notice of completion, or deficiency notice, is issued.

Once completed and accepted, payment can be issued to the contractor.

See what they're saying.

Our Customers Love It!

★★★★★

"Tree Life CA has earned the trust of our Board of Directors through their deep tree-care expertise and recommendations tailored specifically to our community. Their customized plans save our clients money, help trees thrive, and their prompt, reliable communication makes them an invaluable partner for our management team."

-Walter's Management

VALUE UNMATCHED

- Action Plans are fixed-price quotes based on site parameters and tree quantity, not a running bill.
- Apples to apples bids.
- Focus on the many other aspects of property management.
- Avoid unnecessary work that causes harm to trees.
