

Scribe Assistant Consent Form
Sleep Innovations, PLLC

How It Works:

During your visit, your conversation may be transcribed/listened to in real-time by a scribe assistant to create a draft summary of your appointment. This is to ensure your healthcare provider can give you their full attention during the visit. The scribe is only used to prepare notes; it does not make any decisions about your care.

Privacy & Data Security:

- All collected audio and transcripts are treated as Protected Health Information (PHI) and remain strictly confidential. No information during the visit is recorded.
- Our scribe complies with HIPPA regulations and industry-standard security measures.
- Your provider will review and edit all draft notes for accuracy before they become part of your permanent medical record.

Patient Rights:

Your participation is completely voluntary. You have the right to request that the scribe be turned off at any point during your appointment, or you may decline its use entirely.

Consent Agreement:

By signing below, I voluntarily consent to the use of Virtual Scribe during my medical encounters at Sleep Innovations, PLLC.

Patient/Guardian Name (Print):

Date of Birth: _____

Patient/Guardian
(Signature)_____
