TRAVIS COUNTY MUNICIPAL UTILITY DISTRICT NO. 16

June 11, 2026

To Whom It May Concern,

The Board of Directors of Travis County Municipal Utility District No. 16 is pleased to provide this letter of recommendation for Dynamo Dusty's Tree Service, that performed extensive tree management and wildfire risk mitigation work for the Rocky Creek Community located in Travis County Municipal Utility District No. 16 (the "District").

From the outset, Dynamo Dusty's Tree Service distinguished itself through a high level of preparation and due diligence. Prior to beginning any work, its conducted a thorough on-site evaluation of the property, digitally mapped the project areas, and presented the Board with clear options outlining scope, priorities, and anticipated outcomes. This process provided the Board with a well-defined picture of what the completed work would look like and allowed for informed decision-making.

In addition, Dynamo Dusty's Tree Service representatives attended multiple Board meetings ahead of project approval to ensure that Board members were comfortable with the proposed approach, schedule, and objectives. This level of engagement demonstrated respect for the governmental process and a genuine commitment to transparency and collaboration.

Throughout the project, Dynamo Dusty's Tree Service coordinated seamlessly with the District's operator, Si Environmental, and its engineering firm, Jones-Heroy & Associates, Inc., to ensure the work remained aligned with guidance from the District's operator and engineer and project goals, as well as the Board's legal counsel.

Its ability to integrate effectively with the District's Board and professional consultants helped keep the project on track and ensured that any questions from the Board or residents were addressed promptly and clearly. Dusty Drake's Tree Service also provided the Board with a plan and estimate of costs for annual maintenance of the wildfire risk mitigation work.

The work itself was executed with professionalism, attention to safety, and minimal disruption. Canopy raising, deadwood removal, and strategic vegetation thinning were performed in a manner that supported wildfire risk reduction while preserving the health of the trees. The finished result not only met our safety and risk-mitigation objectives, but

was also visually striking – enhancing sightlines, improving overall aesthetics, and contributing to a cleaner, more open appearance throughout the Rocky Creek Community.

Based on the Board's experience, it would confidently recommend Dynamo Dusty's Tree Service to other municipal utility districts, HOAs, and property managers seeking a reliable partner for large-scale tree care, land management, and wildfire risk mitigation projects.

Please feel free to contact the President of the Board, Israel Zuela (rockycreek9@gmail.com), directly for additional information.

Sincerely,

President, Board of Directors
Travis County Municipal Utility District No. 16
