

Peach Loves Case Study

LEGAL & PROFESSIONAL SERVICES

Information contained in this document is strictly private and confidential and is for the company intended information only.

CLIENT CONTEXT

Global Law Firm

A prominent, global law firm operating in high-value, document-intensive legal matters, handling hundreds of documents per case across multiple jurisdictions and legal databases.

Peach Loves often enters non-disclosure agreement and in certain instances can not name clients.

Global Law Firm

Name retracted due to non-disclosure.

The Challenge

- Manual document review and research created inefficiency and risk
- Legal teams needed faster access to relevant information
- Data security and confidentiality were non-negotiable
- Any AI solution had to operate within a closed, secure environment

Peach Loves Solution

Through Peach Loves capability, the team designed a secure AI-powered legal intelligence platform, including:

- AI-driven document ingestion and categorisation (500+ documents per case)
- NLP-based relevance scoring, summarisation, and metadata tagging
- Secure interrogation of legal databases (LexisNexis, Wolters Kluwer, Jus Mundi)
- Closed-source deployment with strict access controls
- Architecture aligned to R&D tax relief eligibility

Technology Stack

- NLP and document classification models
- OCR and language detection
- Secure AI pipelines
- Custom dashboards for legal teams
- Compliance-first system design

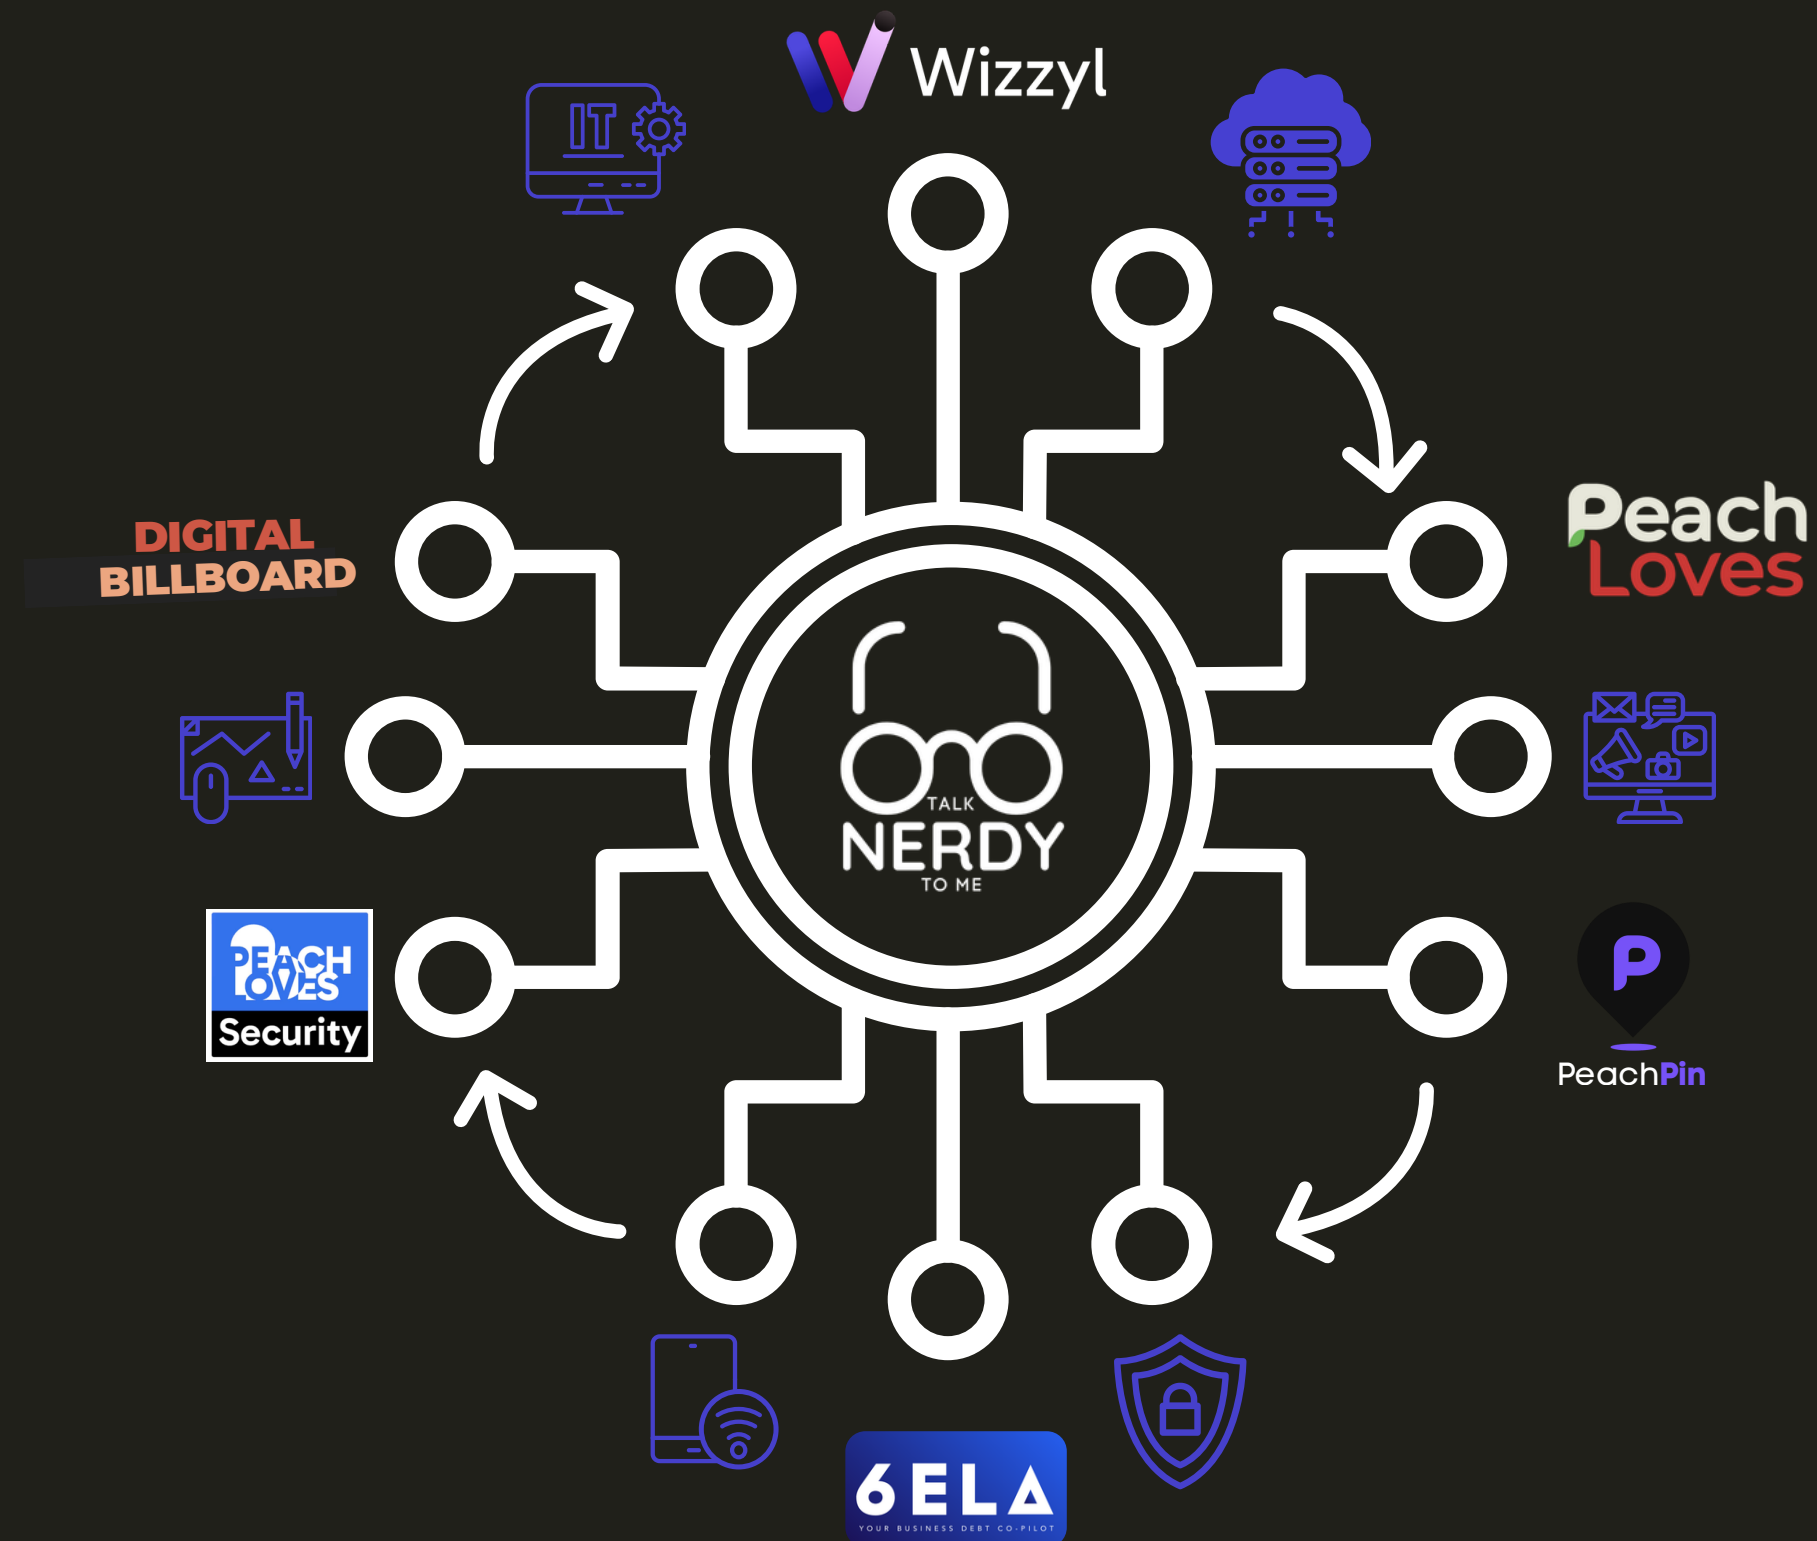

Outcome & Impact

- Dramatically reduced research and preparation time
- Improved accuracy and consistency across cases
- Enabled lawyers to focus on strategy, not document administration
- Created a platform capable of evolving with future AI innovation
