---

## Before Your Treatment

- Remove all items from kitchen cabinets and drawers
  - Empty all countertops and clear sinks
  - Remove pet food and water bowls
  - Cover or store all food items securely
  - Clean excessive grease and food debris from appliances and surfaces
  - Vacuum floors thoroughly, especially under appliances and furniture
  - Wash all dishes and utensils before service
  - Reduce clutter in treatment areas to allow full access for the technician
- 

## During Treatment

- Customers and pets must remain out of treated areas until surfaces are completely dry
  - Technician will need access to kitchen, bathrooms, laundry room, and utility areas
  - Keep all entryways and access points clear for technician movement and equipment
- 

## After Treatment

- Do not deep clean treated cracks, crevices, or baseboards for **7–14 days**
  - Expect increased roach activity for several days as treatment takes effect
  - Maintain strict sanitation—keep food sealed, wipe spills promptly, and remove trash daily
  - Follow-up treatments may be required for severe infestations to ensure full elimination
- 

## Important Notes

- German roach control is a **process**, not an instant elimination
  - Proper preparation **greatly improves treatment success**
  - Failure to prepare may **reduce effectiveness** and delay results
-
