T.A.Potter Installations

Introduction

T.A. Potter Installations are trusted specialists in office fit-out builds and prime residential drylining packages, delivering high-specification finishes with unmatched attention to detail.

We proudly partner with elite principal contractors across London and the South of England, consistently exceeding expectations on prestigious commercial and residential projects.

01 About Us

Who We Are

T.A. Potter Installations is a proud family-run business that is growing year on year. We pride ourselves on providing a wealth of industry experience and a team that is dedicated to progress.

Our team is professional and passionate, with a positive attitude on every site. High energy and enthusiasm are further qualities that set us apart and help build long lasting relationships with clients and contractors alike.

What We Do

At T.A. Potter Installations (TAPI), we’re challenging the traditional perceptions of drylining. Our mission is to elevate the standard — bringing innovation, precision, and professionalism to every project.

We specialise in the installation of tested partition systems, wall linings, and ceiling systems, all designed to meet specific DB ratings, U-values, and fire safety requirements. Our technical expertise ensures compliance and performance without compromise.

What distinguishes us from others is our ability to manage the entire internal wall and ceiling package—from construction through to decoration and specialist finishes. This streamlined approach allows principal contractors to work with one trusted partner, rather than coordinating multiple trades. The result? Seamless delivery, reduced complexity, and consistent quality across the board.

02 What We Do

Dry-Lining

Our primary focus is delivering high-end partition and ceiling systems, tailored to achieve specific results with precision and quality.

Plastering

Since we build the walls, it only makes sense that we finish them. By working with some of the best plasterers across London and the South, we’ve developed a tried and tested network that ensures consistent quality across all our sites.

Specialist Finishes

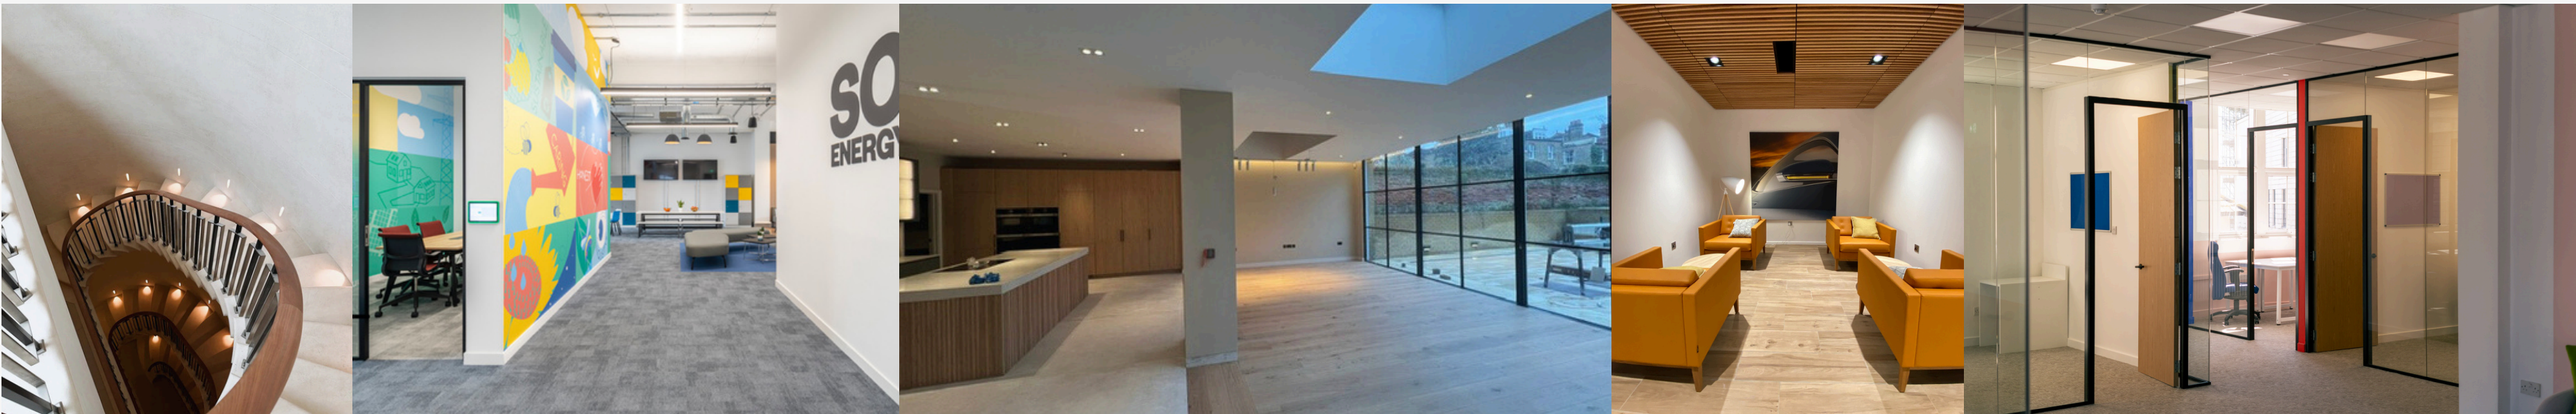

Our residential specialists cover all aspects of high-end finishes—from clay plaster and Tadelakt to Microcement systems—bringing refined detail and craftsmanship to every space.

Commercial Fit-Out Trades

Our specialist expertise and craftsmen offer construction trades specific to commercial interior projects. As such, we offer Dry-Lining, Partitions, Glazed Screens, Ceiling solutions, Acoustic Wall Treatments, Carpentry & Joinery packages.

Decorating

We understand how important decorating is—it's the final finish and the first thing the client sees. That’s why we only work with a select group of trusted decorating firms, with whom we’ve built long-standing relationships. These partners consistently deliver the high level of finish our contractors and clients expect, ensuring every project ends on a strong, polished note.

03 Sectors

Commercial

Fit Out & Refurbishments of office buildings, community spaces, and more. From dry-lining & glazed screens through to plastering & decorating.

Showrooms

Prime Motor Industries, Fashion and Bespoke brands. We provide the necessary traded to deliver your project to the highest standards.
