Important Billing Information for Annual Wellness Visit Appointments

Many insurance companies have changed the level of benefit for Annual Wellness Visits, also called Well Child Examinations or Annual Physicals.

An Annual Wellness visit includes:

- An opportunity to review your child's medical history and look for potential health risks
- Assess overall health and wellbeing
- Update vaccinations
- Order and update preventing screening services such as developmental screens (ASQ, MCHAT), hearing/vision screenings, and blood tests.

Wellness visits do not include management of acute (new) or chronic (ongoing) illnesses.

If time permits, we are happy to extend your wellness visit to address any new or ongoing problems that your child may be experiencing. **However, please note that this may result in your insurance plan determining that the visit is subject to additional charges, such as co-payment, deductible, and/or co-insurance**. You may elect to make a separate appointment to address these concerns as well.

We are happy to answer any questions. If you have questions regarding this notice, or have other billing concerns, please ask to speak with our Billing Specialist.
