

Go live with NotebookLM in 6 weeks and see impact from day one

THE AI KNOWLEDGE HUB FOR SPEED, SECURITY, AND SCALE

NOTEBOOKLM TURNS YOUR KNOWLEDGE INTO INSTANT,
STRATEGIC VALUE – FOR EVERYONE.

You've documented processes, written manuals, and gathered experience, but the knowledge often goes untapped. NotebookLM changes that. Your teams access critical resources independently, without IT bottlenecks. They build integrated knowledge hubs that make an impact from the start.
Put your know-how to work – and see ROI from day one.

CHALLENGE KNOWLEDGE EXISTS - BUT STAYS LOCKED AWAY

Many employees face the same daily frustration: valuable time is lost searching for information, work gets duplicated, and know-how disappears when people leave.

This is especially true in dynamic areas like support, sales, or onboarding – where unclear information flows create extra effort. **The consequences: delays, misunderstandings, and inefficient processes** that cost the company time and money.

SOLUTION CHAT WITH YOUR DIGITAL FILES

NotebookLM transforms existing content into easily accessible, AI-powered knowledge spaces. As the first self-service tool for Retrieval-Augmented Generation (RAG), it enables teams to work with knowledge, without IT barriers: via chat, visualizations, or audio.

Zoi introduces NotebookLM through a structured pilot program: together, we identify real-world challenges, define one or two concrete use cases, and implement them with focus. **The result: a hands-on start with measurable value – in just six weeks.**

4 BENEFITS TURNING COMPLEXITY INTO CLARITY

1. Instant access to knowledge	2. IT-Independent Usage	3. Securing Know-how	4. Fast Time-to-Value
Relevant information on demand – no more time wasted searching.	Your team accesses knowledge easily and autonomously – no IT barriers, no complex training required.	Valuable know-how stays within the company and remains actively usable – even when employees leave.	Ready to use within weeks – with immediate impact on daily business.

USE CASES

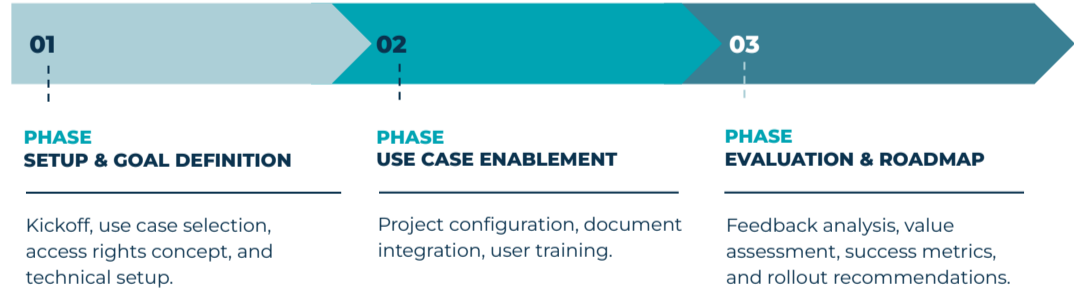

In the pilot program, you select one or two relevant use cases to shape and implement together. Each use case is tested in a real-world environment, and can be scaled if successful.

EXAMPLES OF TYPICAL APPLICATION SCENARIOS

- ➔ **Prepare board meetings:** Structure documents, generate audio overviews, and create solid decision-making foundations.
- ➔ **Strengthen customer support:** Enable direct access to technical manuals, product documentation, and service processes – searchable via chat.
- ➔ **Support sales teams:** Provide bundled product knowledge, pricing overviews, and sales talking points – all in one place.
- ➔ **Optimize HR & onboarding:** Use interactive manuals, policy overviews, and digital welcome kits to streamline the onboarding experience.
- ➔ **Preserve knowledge transfer:** Document experience-based knowledge and simplify handovers during personnel changes.
- ➔ **Scale training & enablement:** Enable self-directed learning through embedded content, learning paths, and FAQs.

PROCESS & DELIVERABLES

Duration: 6 weeks | Participants: up to 30 users

UNLOCK MORE Complementary modules to support your journey.

01 C-Level AI Enablement Executive workshops on AI literacy, decision support, and the strategic use of NotebookLM and other AI tools.	02 1:1 AI Sparring Sessions Individual coaching for executives – to support the effective and thoughtful use of AI in everyday work.	03 Company-wide rollout Planning and implementation of a scalable rollout architecture – including change management, enablement sessions, and impact tracking.
