

THRIVE WITH GOOGLE WORKSPACE

# SECURE ENTERPRISE BROWSING WITH CHROME ENTERPRISE PREMIUM

Enhance your digital workplace security posture and reduce costs by implementing a zero trust security model with ease.

Chrome Enterprise Premium provides all employees secure access to applications and data based on user and device identity, rather than relying on traditional perimeter-based security. Zoi's Google Workspace practice team offers expert guidance to help organizations plan, design, build, and operate their Chrome Enterprise Premium implementation – giving all employees the most secure digital workplace experience.

## SOLUTION

### ADOPTION JOURNEY

**THINK** – The light-touch, yet holistic review of your current digital workplace security approach uncovers the relevant factors and provides an actionable roadmap for the next steps.

**DESIGN** – Test a prioritized list of CEP functionalities, validate policies and process improvements, gain better insights and gather feedback from stakeholders.

**BUILD** – Develop and execute a phased roll-out for your organization. Adopt advanced protection settings through active change and stakeholder management.

**RUN** – Working with you to establish a reliable operating model for Chrome Enterprise Premium focused on continuous improvement regarding evolving threats and business needs.

## HOW YOU BENEFIT

### Zero Trust Security Applied

Context-aware access controls enables fine-grained, dynamic access control to web applications based on user identity, device security posture, location, and other signals

### Effective Data Loss Prevention

Implements content-aware rules to inspect and control sensitive data movement within the browser, preventing unauthorized copying, pasting, printing, screen capture, uploads, or downloads.

### Better Security. Less Overhead for Admins

Retire legacy perimeter-based security platforms and reduce associated overhead with the native integration in the Google Workspace admin console.

## ABOUT ZOI

We enjoy supporting your efforts to provide all employees with a browser-first, secure digital workplace with Chrome Enterprise Premium.

Zoi is a cloud native IT consultancy that closes the gap between enterprises and new technologies. Together with our strong partners, we are passionate about solving the business challenges of our Retail and Manufacturing customers.
