THE TIME IS NOW

ARE YOU CONSIDERING UPGRADING YOUR SAP SYSTEMS TO S/4HANA ON AWS?

We know it's not an easy decision to make. Whether it's the criticality of your SAP workloads or the prospect of a potentially costly and disruptive migration that's concerning you, Zoi can help.

As an **SAP Gold Partner and AWS Premier Partner**, we specialize in **determining the impact S/4HANA on AWS** could have on your business, as well as what you need to do to make the conversion process as fast, low-risk, and cost-efficient as possible.

GET READY FOR TAKEOFF

THE SAP S/4HANA OPPORTUNITY AND HOW TO SEIZE IT ON AWS

With an end of maintenance deadline for legacy systems set for 2027, SAP customers of all sizes and industries are posed with an important question — is now the time to upgrade to S/4HANA? For many organizations there is no clear answer, only more questions.

Business decision-makers will often find themselves stuck weighing the pros and cons of S/4HANA vs. SAP ECC, or wondering if their established Z developments will survive the upgrade, or if they will have to wade through unexpected licensing issues during the process.

Without a clear understanding of the business impact of upgrading to S/4HANA, it's near impossible to justify the investment required to do so. Let's start there.

With SAP S/4HANA, you'll gain new capabilities, including intelligent automation driven by artificial intelligence, industry-specific workflows based on best practices, and dramatically improved performance from SAP HANA – an in-memory database designed for real-time decision making.

Equipped with these capabilities, you can bridge gaps between disparate business units and create richer customer interactions. **When you use SAP S/4HANA on AWS, you'll get even more.**

SAP: MORE AGILE THAN EVER

SAP S/4HANA ON AWS

AWS has been jointly innovating with SAP since 2008 and was the first provider to host SAP workloads in the cloud. Since then, AWS has continued to lead the way and now offers over 175 services to help businesses get the most out of their business-critical SAP systems.

With over 5,000 active SAP on AWS customers – more than half which are running SAP HANA-based solutions – AWS is the leading platform of choice when it comes to cloud-based SAP.

THE BENEFITS OF SAP S/4HANA ON AWS

PARTNER WITH AN EXPERT FOR BETTER RESULTS

The AWS Partner Network (APN) pairs SAP on AWS customers with proven, vetted, and certified experts. AWS recommends working with an APN Partner to make migration as fast, cost-effective, and secure as possible, with minimal risk and

business disruption. APN Partners that have been awarded the SAP on AWS Competency – like Zoi – have demonstrated the ability to help businesses successfully migrate and run their SAP systems on the AWS platform.

AGILITY AND SPEED

Provision all the required infrastructure for an SAP S/4HANA edition implementation in minutes compared to waiting weeks or months to procure and deploy traditional infrastructure.

SCALABILITY

Provision only the amount of infrastructure and memory initially required for your SAP S/4HANA system, and then scale the infrastructure and memory as your requirements expand over time.

LOWER TCO

Benefit from the economies of scale and efficiencies provided by AWS. Pay for only the compute, storage, and other resources you use – delivering savings of up to 71% compared to running SAP systems on premises.

REPLACE CAPEX WITH OPEX

Start an SAP S/4HANA edition implementation on AWS without any upfront cost or commitment for compute, storage, or network infrastructure.

SAP EXPERTS, NATIVES IN THE CLOUD.

MEET ZOI

As an **SAP Gold Partner and AWS Premier Partner**, Zoi specializes in helping businesses judge the impact S/4HANA on AWS could have on your organization before committing to migration. If you decide you want to migrate, **our experts can help you assess your readiness and make sure you are prepared** to take advantage of all the benefits that S/4HANA on AWS has to offer.

We understand that the criticality of SAP systems can make the prospect of migration appear risky and expensive. It's also not always obvious if your current SAP systems are even ready to upgrade, or how hard it will be to migrate to AWS, or what the exact project requirements will be in terms of timings, resources and associated costs.

That's why we developed the S/4HANA Drive solution, enabling our customers to better understand the benefits S/4HANA on AWS can deliver and **what preparation is needed to make migration as simple, cost-efficient, and risk-free as possible.**

KEY BENEFITS OF S/4HANA DRIVE

RISK-FREE DECISION MAKING

Understand the benefits of S/4HANA for your business and assess readiness before committing to a full scale migration.

MIGRATION WITHOUT SURPRISES

Receive a detailed report containing all the important data you need to make the decision to migrate to S/4HANA.

SAVE 20% ON MIGRATION

If you decide to migrate, you will receive a 20% discount for the migration performed by Zoi.

S/4HANA DRIVE IN DETAIL

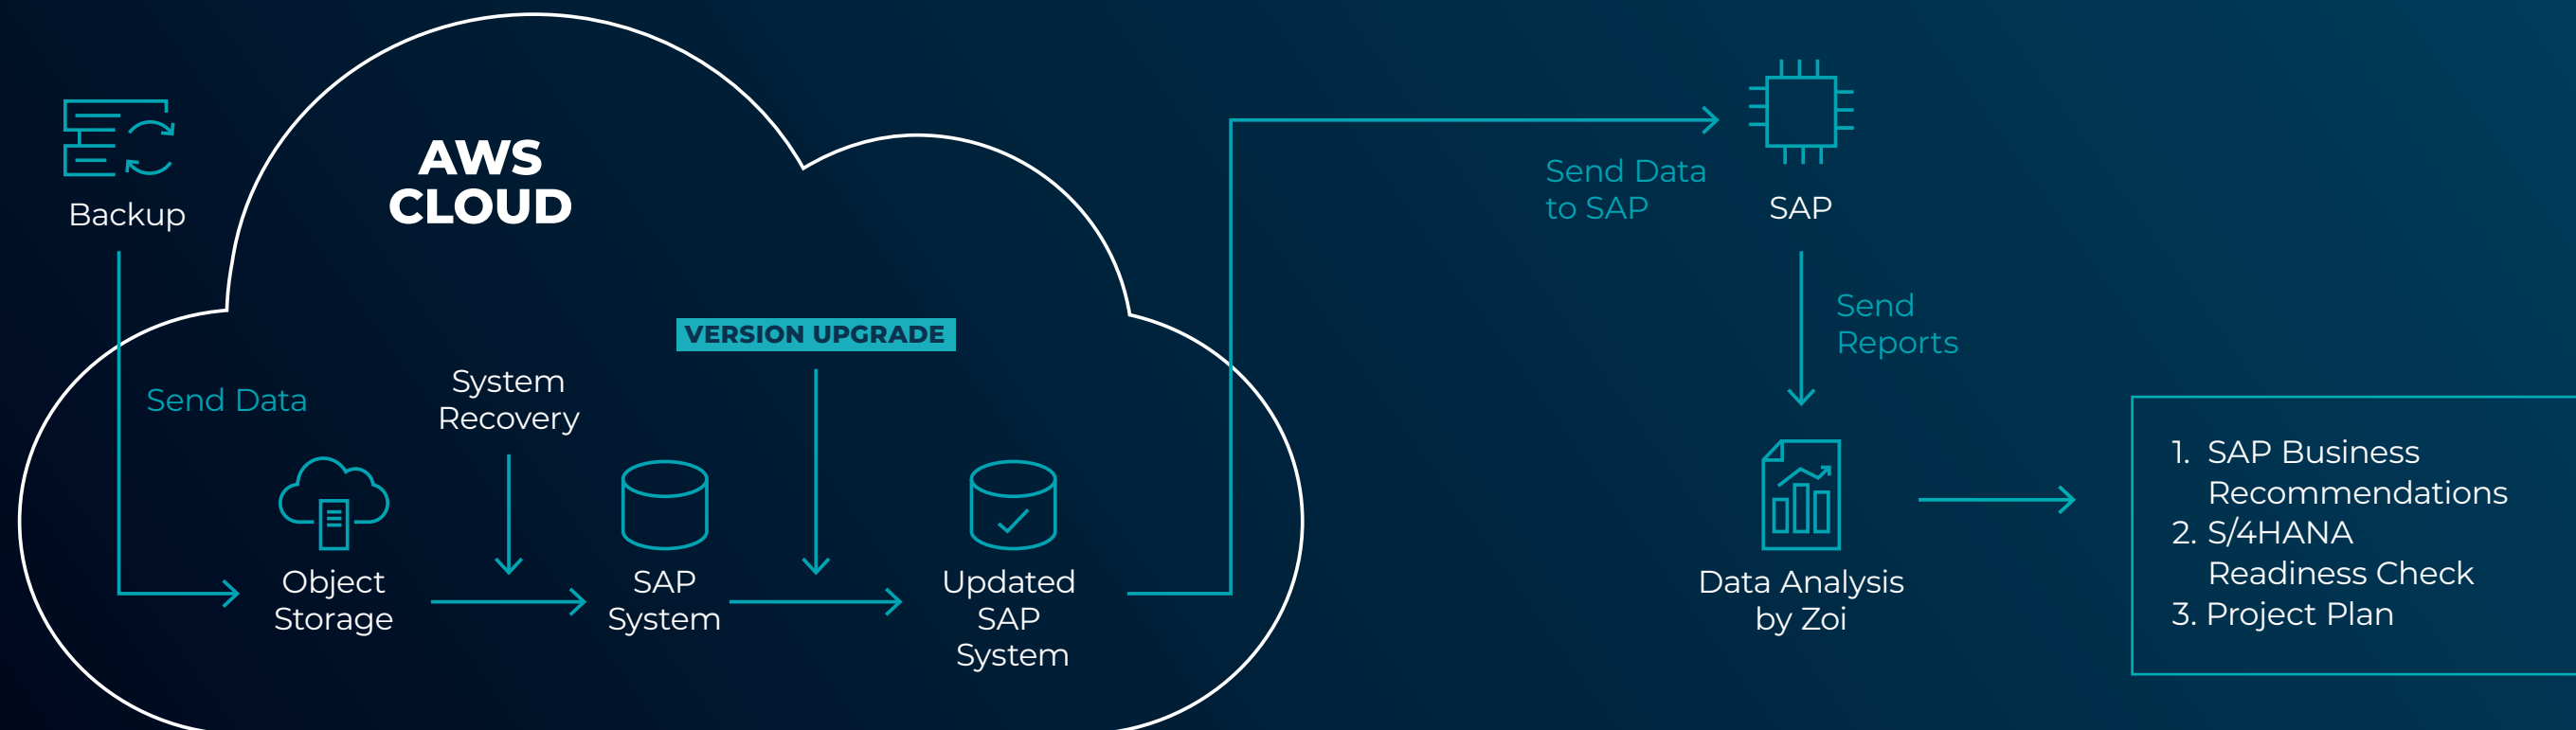

A CLOSER LOOK AT S/4HANA DRIVE

The first step to determining your S/4HANA readiness is understanding the current status of your existing SAP systems, and the potential benefits S/4HANA on AWS migration could bring to your business.

Our experts capture this information using a detailed **SAP Business Recommendations Report and comprehensive S/4HANA Readiness Check.**

In order to generate this report, you will need to update your **NetWeaver to at least version 7.31 SP9**. If you do not have the right patch level, Zoi can upgrade a copy of your production system to the **AWS Cloud**. All we need is **a copy of your SAP database**.

Later, we will retrieve the necessary data to obtain the official SAP reports from this copy. You can also use this version of your SAP systems to explore the benefits of the AWS Cloud.

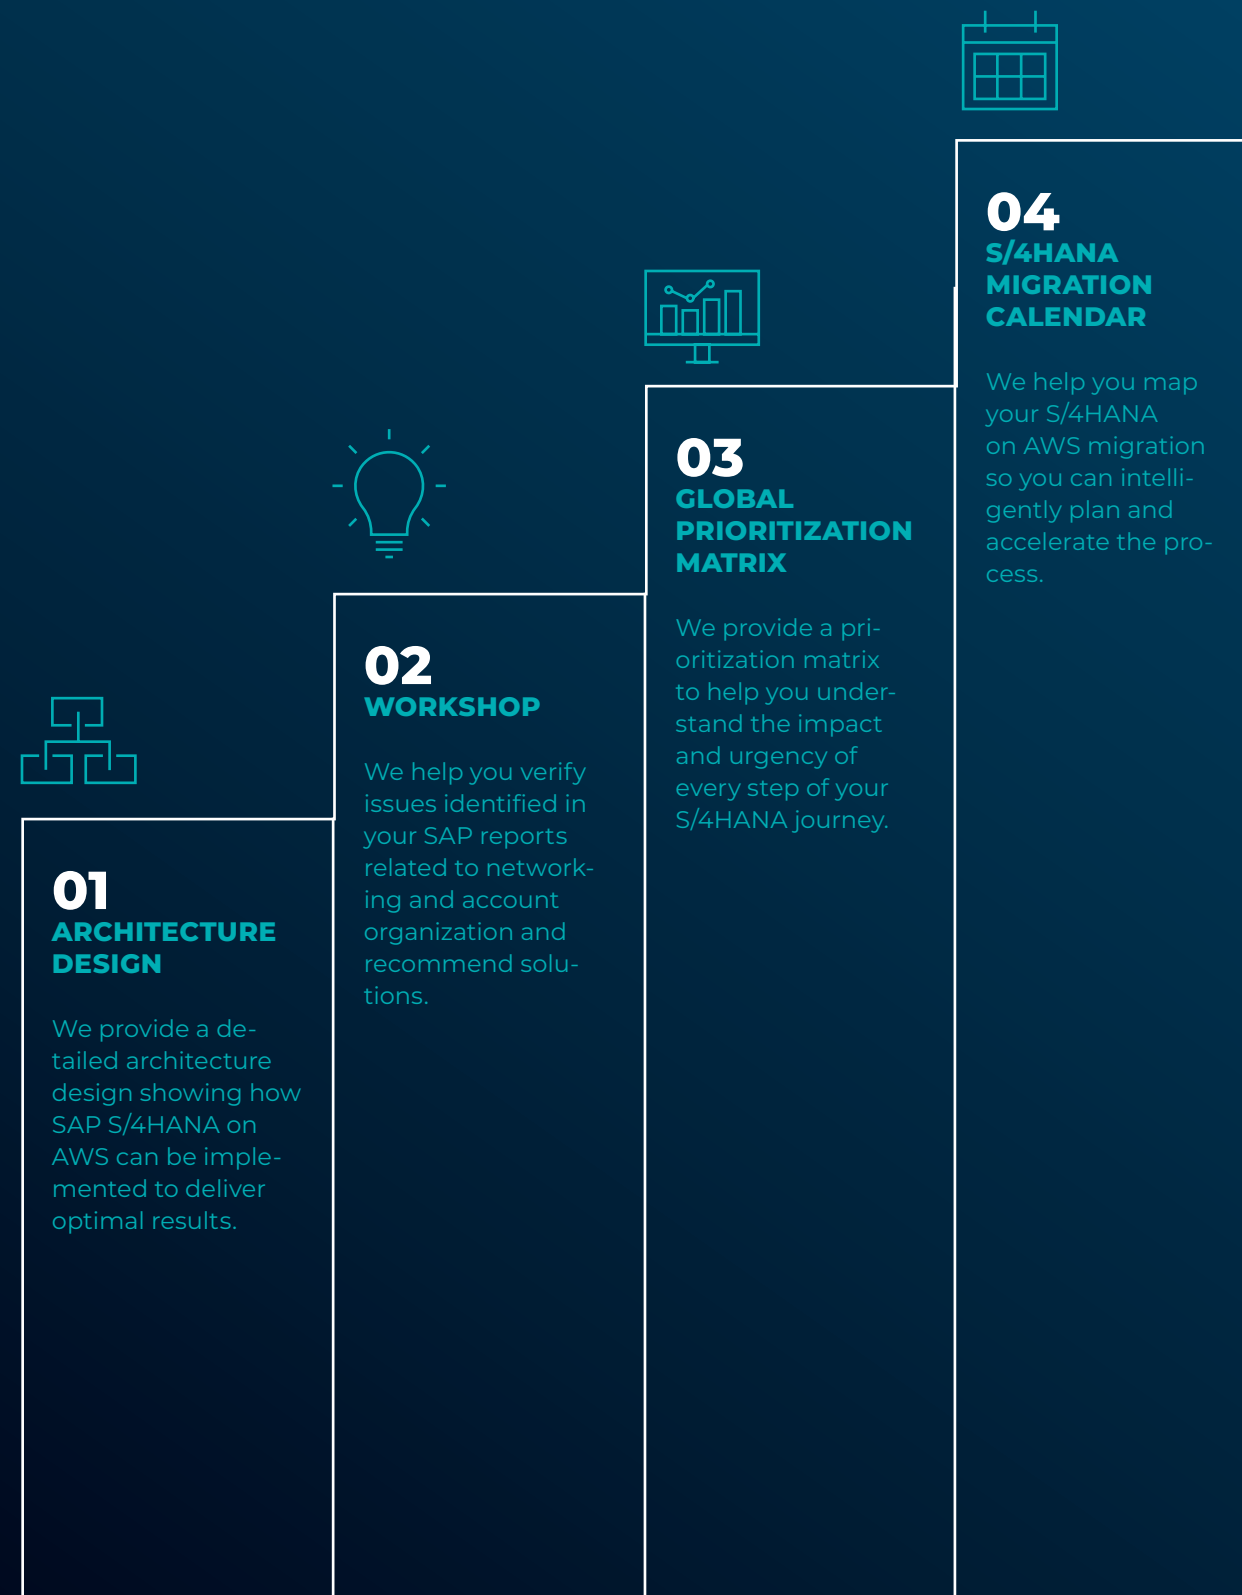

SAP AND CLOUD EXPERTS AT YOUR SERVICE

ZOI GUIDES AND ACCOMPANIES YOU ON YOUR S/4 JOURNEY

Once we have received your official reports from SAP, our experts will analyze both the benefits of upgrading to S/4HANA on AWS and provide recommendations on how we think you should approach migration (greenfield vs. brownfield). We will outline everything from estimated project schedule, required resources, licensing cost breakdowns, overall migration and implementation costs, and more.

If you decide to upgrade and migrate your SAP systems to S/4HANA on AWS and contract Zoi to help you do it, you'll receive a 20% discount!

ZOI IS HERE TO HELP

WHAT CAN SAP S/4HANA ON AWS DO FOR YOUR BUSINESS?

If you're considering upgrading your SAP systems to S/4HANA on AWS but remain unsure of the potential business benefits it could bring, or if your organization is ready to migrate, Zoi is here to help.

Our proven, holistic approach and experience are your fastest route to reaching your SAP S/4HANA goals and enhancing your business with all the AWS platform has to offer.

ABOUT ZOI

Zoi is an AWS Premier Partner and SAP Gold Partner. **Our experts have proven experience working with AWS technologies since 2012 and with SAP technology since 1998.** We specialize in helping businesses meet their most demanding SAP on AWS challenges with creative and innovative solutions.
