# ASSESS YOUR CARBON FOOTPRINT

Understanding your current CO<sub>2</sub> emissions is the first step. Our team at IGF will help you identify the sources of your emissions—whether from energy use, transportation, or other operational aspects.

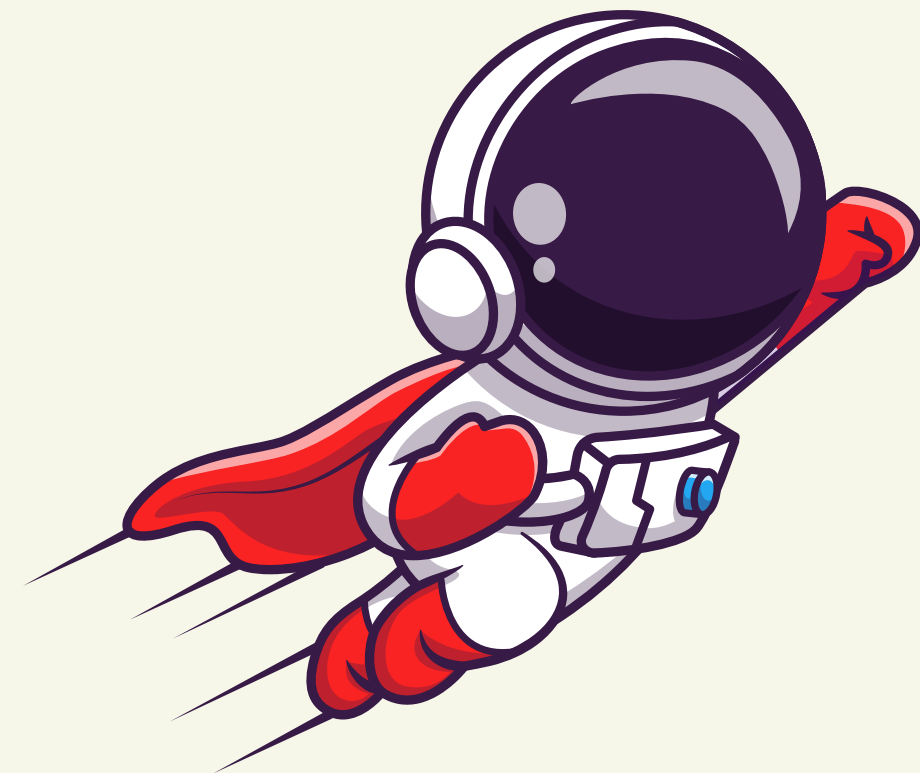

This baseline assessment is crucial for planning your reduction strategies.

Choose a Zero Hero subscription plan that fits your business needs.

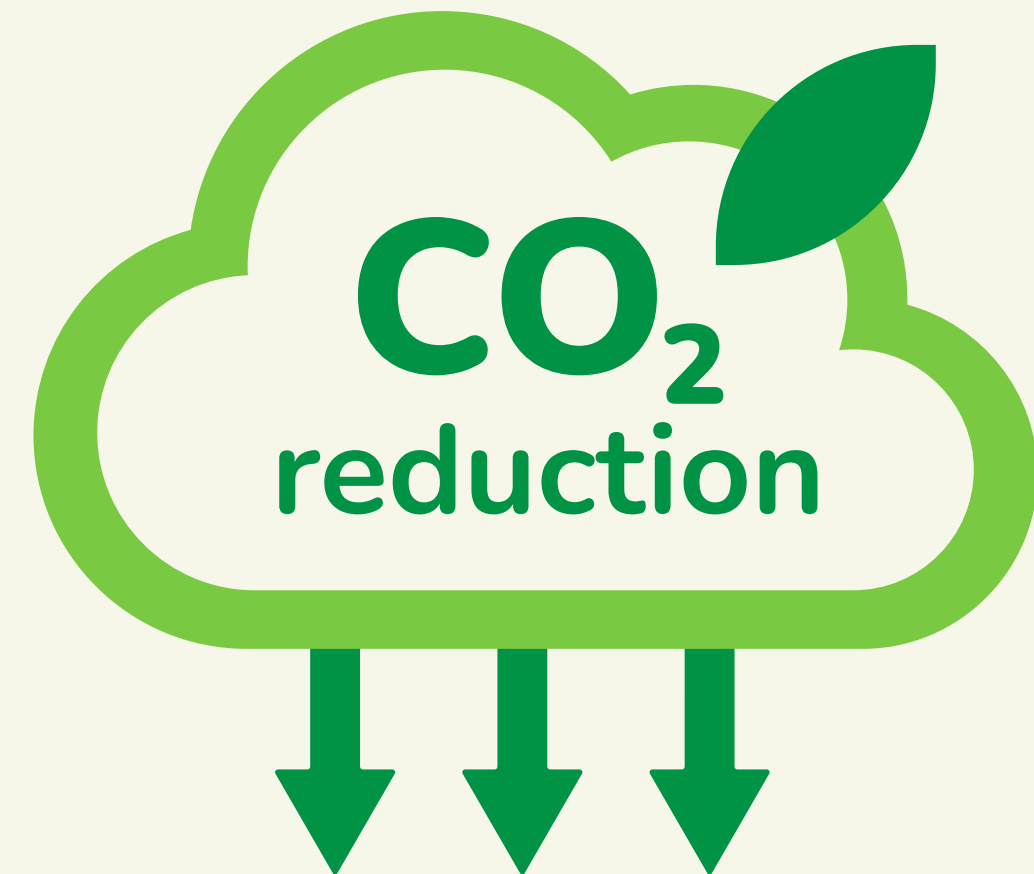

Each plan includes a commitment to support impactful CO2 offset projects, aligning your sustainability efforts with your business objectives and goals.

# GET PERSONALIZED RECOMMENDATIONS

Once we have assessed your emissions, we'll provide you with tailored recommendations for reducing your carbon footprint.

This includes selecting effective carbon offset projects and implementing practical sustainability measures specific to your business.

# IMPLEMENT OFFSET PROJECTS

Invest in certified CO2 offset projects through our Zero Hero campaign.

These projects, such as reforestation or renewable energy initiatives, are carefully vetted to ensure they meet high environmental standards and contribute significantly to offsetting your emissions.

Enhance your corporate image by sharing your sustainability journey.

We provide storytelling materials, including videos and photos, to showcase your commitment to reducing carbon emissions and supporting global sustainability efforts.
