

Olin Library

Mold Remediation

Middletown, Connecticut

The Building:

Olin Library is one of the most prominent buildings at the campus of Wesleyan University. It is centered at the head of the activities field and presides over commencement ceremonies. Its size is 220,000 ft².

Nature of Firm's Responsibilities:

Landmark Facilities Group, Inc. provided initial monitoring and testing to assess environmental conditions followed by extensive modifications to the HVAC systems to prevent the recurrence of mold problems. New precision controls were designed by Landmark Facilities Group, Inc. to produce an archive quality environment for the library and its rare books collections.

Landmark Facilities Group, Inc. provided complete preliminary investigations followed by design and construction support activities. The remediation project cost was \$1,500,000.
