

Response Codes for Positive Response

If a response action is final, the response closes, and no further action is required. If the response action is not final, the response remains open until a closing/ final response has been applied.

Cancel Request and Damage ticket types do not require a Positive Response.

Positive Responses will not be accepted for any ticket type once the ticket has reached its expiration date. After expiration, the ticket is no longer eligible for response submission.

Number Response	Word Response	Description	Final
2	Located – Facilities Marked		True
3	Clear – No Conflict		True
