

Cyber Risk Followed You Home.

Protection built for the household, not just the office.

Extortion and Ransomware

Criminals lock devices, smart-home systems, and files, then name a price. Personal cyber coverage funds the response and guides the decision, so a family is not facing it alone.

Fraud and Social Engineering

A convincing email or call reroutes a wire, a tuition payment, or a home closing. This is one of the fastest-growing losses for families of means, and a standard home policy rarely covers it.

Identity and Reputation

Stolen identities, hacked accounts, and online harassment can take months to undo. Coverage pays for restoration, legal help, and the specialists who make it stop.

**Your household runs like a business online.
It should be protected like one.**

Let's Look at Your Coverage.
