Nutrien Ag Solutions®

Welcome

It is with great pleasure that we welcome you to our 5th on-property sale at Retallack, Ariah Park, where once again we bring together the genetics of Bauer and Retallack Border Leicester Studs.

It is an exciting time to be in the sheep industry. Lamb prices remain strong, demand for quality 1st X ewes is encouraging and well-bred ewes are selling extremely well. For those producing 1st X ewes, the opportunity is clear — and we believe there has never been a better time to be investing in the genetics that go into them.

This year we are proud to offer 80 rams, with a consistent and even draft right throughout the catalogue. Our focus remains firmly on producing modern, structurally correct, ready-to-work Border Leicester rams that can make a genuine difference to commercial flocks.

For us, the real measure of a ram is what he does after sale day. We are proud to see Bauer and Retallack genetics featuring heavily in some of the leading 1st X ewe sales, with our clients achieving outstanding results. Seeing those genetics working in commercial programs and delivering results for our clients is what drives our breeding program.

Both Bauer and Retallack genetics are strongly represented throughout this year's offering. The rams display the consistency, structure, breed type and commercial focus we have worked hard to develop. Every ram has been Stockscan measured and micron tested,
providing buyers with comprehensive information to assist in their selection.

All sheep offered are Brucellosis Accredited (76472), Approved Vaccinates and have been vaccinated annually for the 23rd consecutive year. The only sheep run on the property are our two studs.

To our returning clients, thank you for your continued confidence in our genetics and for allowing us to be part of your breeding programs.

And if you have never been to our sale before, we invite you to come and have a look at what we do. Walk through the rams, see the sheep behind the name, talk to us about our breeding program and judge the offering for yourself.

We would be delighted to welcome you to Retallack on sale day.

As always, complimentary delivery is available, numbers permitting.

Jamie, Tracey & Lachlan Buerckner

Bauer & Retallack Border Leicester Studs

MEMO OF SIRES

Bauer Supreme 7th 231397 (G7224)
Sire: Bauer Supreme 6th (G5054)

Dam: Retallack 161580 by Retallack Heza Callum (F5202)

Introduced Sires:

Geraldine Eagles Blood P29/20 (T) (G3484)
Sire: Pina 202/15 (F8891)
Dam: 16/15 by Ellingerrin 3044/13 (F7206)

Cooinda Wes 230032 (T) (G6135)
Sire: Gleneith 210220 (G4876)
Dam: Cooinda 200215 by Cooinda Breakaway (G1250)

Scanning for performance traits in animals has become a significant on-farm measuring tool for many years.

Australian Stockscan Services P/L scanners assess sheep at around 8-12 months of age for:

- Live Weight (LW)
- Eye Muscle Width (A)
- Eye Muscle Depth (B)
- Fat Depth (C)
- Eye Muscle Area (EMA) is calculated using the eye muscle width (A) and depth (B) measurements (A x B).
- Eye Muscle Area (EMA) to Live Weight (LW) ratio calculated.
- Meat Index Live Weight measurement.

The meat index formula is based on the eye muscle width (A), eye muscle depth (B) and fat (C) measurements. A higher predominance is given to eye muscle width (A) because it is more heritable while eye muscle depth (B) is influenced by environment factors. Fat (C) is penalised slightly. The resulting number is then adjusted for the age of the sheep, so the index is what the sheep's index would have been at eight months of age.

LOT 101

We're mixing this up at this years sale.....

After all the rams are sold, our trailer will be offered.

No breeding potential. Plenty of carrying capacity.

SPECIALLY SELECTED RAMS

Lot 1 **249 (S)**
