

Case Study

Lens Legacy

Summary

I photographed the 50th anniversary party in Waverly, capturing the special moments, guests, decorations, and overall atmosphere of the celebration. I focused on candid interactions and important details to create a collection of photos that documented the event and its memorable moments.

Process

For this shoot, I focused on capturing the event as it naturally happened. I photographed a mix of candid moments, group photos, details, and important parts of the celebration. I moved around the event to capture different angles and moments while making sure the photos felt natural and represented the atmosphere of the 50th anniversary party.

Solution

My solution for the different natural and artificial lighting in the venue was to adjust my camera settings as I movedaround the space. I balanced my ISO, shutter speed, and aperture to work with the available light while avoiding photos that were too dark or too bright. I also looked for areas with more even lighting to help keep the photos consistent.

Will we work with them again

I would be happy to work with them again in the future. I enjoyed photographing their 50th anniversary party and capturing meaningful moments throughout the event. It was a great experience, and I would be excited to help document another event for them.
