

# COVID-19 IPAC Fundamentals Training

Welcome to PHO's COVID-19 Infection Prevention and Control (IPAC) Fundamentals training. These IPAC resources will help you prepare for your role as you respond to the COVID-19 pandemic.

These modules were developed for:

- Long-term care
- Congregate living settings (e.g., group homes)
- Inspectors, investigators and assessors that support long-term care and other congregate living settings
- Families of residents in long-term care and other congregate living settings

Please choose the module that is most appropriate for you.

The time to complete a module will vary, depending on which stream you choose and your prior experience with IPAC concepts.

PHO is interested in evaluating the use and effectiveness of this material. You will be taken to a short survey about your experience at the end of each course, which will help us to make enhancements.

Thank you for taking part in this online learning opportunity and for your work to stop the spread of COVID-19.

Below you will find a form with a few questions to guide you to the right content. Please choose the most appropriate answers from the drop-down menu for each question. Click "Submit form and start course" when you have completed all of the appropriate fields to be taken to the course content.

**Please select the role that best describes you**
