

HM200P

As height of person plays an important role in treatment. Especially BMI, Body Mass Index (BMI) is a calculated value which allows you to define how well the mass of the human body corresponds to the height and consequently a degree of over- or underweightness. Using BMI you can try to estimate the risk of developing an illness due to excess or low weight. Easy to assemble and simple to use HM200P makes weighing an easy routine job. HM200P is easy to carry because of its light weight and detachable parts. Carry case makes everything easy and simple.

Product Description

- Measuring range – 14~205cm
- Division – 1mm
- Manual type
- Standard kit with carry box

Product Specifications

Measuring range	14~205 cm
Graduation	1 mm
Dimensions	350x400x2430 mm
Weight	1.9 kg
Power supply	-
Features	Self-assembly height rod with base plate.
