WHO ARE WE?

We are a small family cooperative based in Kisii Kenya, where we produce the most magnificent Soapstone Carvings. Each piece is individually hand carved, waxed polished or painted. The finished product is simply beautiful.

WHAT ARE WE DOING?

The aim of our group is to raise funds through the sale of Soapstone Carvings, ensuring all children in our community and the surrounding area have access to education, shelter and medical care.

WHAT IS SOAPSTONE?

Soapstone (also known as steatite or soaprock) is a talc-schist, which is a type of metamorphic rock. It is largely composed of the mineral talc, thus is rich in magnesium. It has been a medium for carving for thousands of years. The process involved in each carving is truly a labor of love for all of our artisans.
