Lustre

Turnaround time: 24-72 hours

Get your photos off your screen and into your hands.

Lustre, our most popular finish for photographic prints, is widely considered to be the industry standard. With rich detail, true-to-life colour and archival durability, your images are preserved the way they're meant to be seen — vivid and tangible. Create something meaningful that can be held, shared, and passed down to the next generation.

Professional papers are designed for archival stability, helping prints resist fading and deterioration for decades.

Looking for something eye-catching & different?

Your images will stand out on Metallic paper!

This paper contains a very special component - pearly mica crystals. With a striking, high-gloss finish and subtle metallic sheen, your images will be brought to life; its unique finish adds shimmer and depth to images, giving photos a slight 3D effect. The result is a vivid, polished look that adds a contemporary, luminous quality to every print.

Metallic photographic paper has an untextured, high-gloss surface.

Don't see the size you're looking for?

No problem! We can print **custom sizes** on most of our paper surfaces. When ordering, simply choose the closest size and tell us what you want in the comments. If there's a price discrepancy, we'll contact you!

Prices displayed are for Floater Frame only.

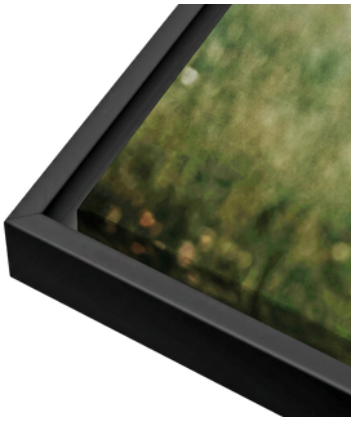

The gallery touch your canvas deserves.

A floater frame is the detail that turns a great canvas into a finished piece of art. Its sleek black border creates subtle space around your image, adding depth, contrast, and a clean, gallery-ready presence. The result is a refined, elevated look that feels intentional, polished, and truly complete.

AVAILABLE IN BLACK ONLY

Framed Fine Art

Turnaround time: 10-15 Business Days

A great photo deserves more than just a print — it deserves to feel complete.

Our framed fine art prints are thoughtfully finished and arrive ready-to-hang, turning your image into a polished piece of wall art the moment it's in your hands. No extra steps, no guesswork — just unwrap, hang, and enjoy. It's a simple way to elevate your photos into something professional, lasting and refined.

Turn your photo into a finished piece of wall art — no framing required.

Plaque Mounts arrive ready-to-hang with a clean, beveled edge in the colour of your choice and a durable, rigid backing that stands the test of time. The smooth, washable surface makes them perfect for high-traffic spaces, keeping your image looking sharp with minimal effort.

Affordable and built to last, they're an easy, practical way to get your photos off your device and onto your walls. Just hang it up and enjoy!

MOUNTING & LAMINATION

Mount + Lam

Turnaround time: 3-5 Business Days

Give your prints the protection they deserve without compromising their look.

Adding Mounting and Lamination to your prints helps them resist environmental damage and maintain their appearance over time—making it a simple upgrade for long-term durability. We recommend mounting for prints 11×14 and larger.

Why add Smooth Mount?

Mounting your print keeps it rigid and strong, preventing damage and warping over time. In warm or humid conditions, unmounted prints can ripple, sag, or even stick to glass; an acid-free mount material like Smooth Mount will significantly extend the life of your print.

Why add Leather or Pearl Lamination?

Adding a clear protective layer that shields your print from moisture, scratches, fingerprints and everyday dirt adds durability and allows for easy cleaning with a soft, damp cloth—making it a great option for framing without glass.

BIG Scans for BIG Stuff!

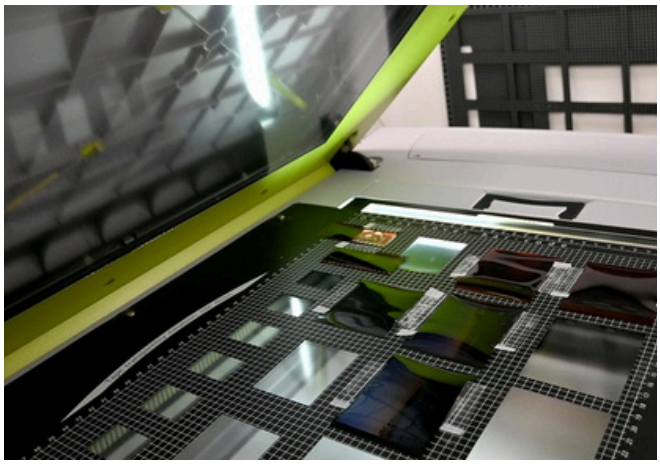

Whether scanning negatives, slides or prints, our high resolution professional scanner will capture every detail of your original. We're dedicated to producing the best possible scans and reproductions of your artwork!

Scan sizes and costs are based on 300 DPI, 8-bit colour, and every scan includes basic colour correction and dust clean-up.

This service is ideal for:

- Superior image quality and detail
- Large-format printing and enlargements
- Digital restorations
- High quality archival preservation (future-proofing)
- Digital sharing and organization

Scanning at a higher DPI (600+) will cost more. Colour-matching, burning, dodging, repairing damage (scratches, dust, dirt, etc.) are subject to additional digital retouching fees, by quotation.

Fine Art Camera Copy

True-to-life digital and printed reproductions of your original artwork.

Using professional lighting, colour management and high-resolution imaging techniques, we make every possible effort to capture and preserve each texture, tone, and nuance of your original. Whether you're creating archival records, selling prints or sharing your work digitally, this is a professional way to reproduce your art exactly as it was meant to be seen.

For the closest colour-match possible, we recommend all art reproductions be printed at our lab, on either Canvas, Vibrance Matte, Pura Smooth or William Turner fine art papers.

RESTORATIONS

Photo Restorations

Turnaround time: 10-15 Business Days

Your faded and damaged photographic heirlooms can be brought back to life!

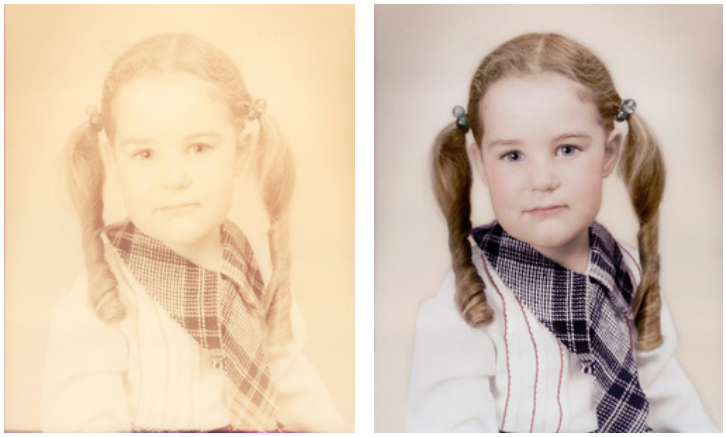

Drop off your item to be restored to either of our locations. Our staff will provide you with a quote, taking into consideration the level of damage, time and work required.

To restore your photo or document we make a high-resolution scan from your original, completing the restoration digitally. You can then have printed copies, the digital file, or both if you choose.

DIGITAL LAB PHOTO RESTORATIONS	
Set-Up Fee Applied to all restorations, as we must obtain a digital file from your photograph.	$25.00
15 minutes For quick fixes such as tonal changes, colour matching and minimal clean-up.	$37.50
1 hour For larger jobs requiring extensive restorative work.	$150.00
Digital File on USB	$7.00

Quotes are determined for free on a per-job basis and are based on the time required to complete the requested work.

RESTORE COLOUR & DENSITY

Sometimes we can bring back and improve original colour; but in this case we had to colourize the whole image.

We can fix damage such as:

- Rips, tears and creases
- Scratches, dust, stains, dirt and fingerprints
- Water, mold, fire, or smoke damage
- Yellowing, fading, and colour shifts
- Contrast, exposure, or density issues
- Damaged faces or important features
- Lost or heavily damaged areas
- Cropping, straightening and perspective issues
- Removing unwanted objects, text or distractions

...and more!

RESTORE FACES & FEATURES

It can require more extensive digital work to retain features, especially if there are parts missing or severely damaged areas.

RESTORE SEPIA AND CLEAN UP DUST & SCRATCHES

Many old prints just need some colour & density adjustments, dust cleaning and scratch repairs.
