

# Friendly® Beds

**Help yourself vs. relying on others-  
can provide strength conditioning benefits.**

Sleep in your own comfortable bed!  
Structure adapts to most queen/double/twin beds-  
(8" off-center for king bed- with one assist rail)  
Also fits many hospital and adjustable beds  
Design is modular, upgradeable and heavy duty

Allows more independence and reduces risk to caregiver/spouse

Home Care, Independent Living, and Assisted Living-  
may allow staying in comfortable home surroundings  
vs. the more expensive options of assisted living and  
nursing home environments. Also suitable for Group Homes

Why be forced to sleep in a narrow hospital bed?  
If only mobility assistance is needed then sleep in  
the type of bed you prefer!

Model FB (Friendly Bed) fits most beds.

Model TB (Twin Bed) for twin size or hospital beds only.

**Denis L Ashauer**  
President  
Home Helpers

"People enjoy a higher quality of life in the home environment. Anything that allows them to safely stay home longer is a huge benefit. Walkers and lift-chairs have been around a long time but there is finally a product that focuses on the bed area. This Friendly Bed System is very heavy duty instead of the current lightweight aids on the market."

"Dad is so very pleased with it. Has had 2 nights with the system and he reports a freedom with it that he hasn't experienced in a long time." – Vicki

"David is getting stronger, and able to get himself out of bed and turn over in bed, I wish we had found you sooner." – Rosalie

"We love the new Friendly Bed! It is already making a huge difference for my dad's mobility & safety, & Mom's safety too." – Kathy

"It is really, really wonderful- I am ecstatic; You have given me my independence back; I am a very pleased customer!" – Barbara

"It's just been night and day for them how great this product has been." – Kathy

"It is working out very well and I seem to be stronger now, this is a God-send." – Nelda

"We discovered Friendly Beds® at a time when things were really beginning to get difficult & it has made a great difference in our lives. " – Kathleen

**Joe Vosters, P.E.**  
President, Bill-Ray

Based on seeing the mobility difficulties of a stroke afflicted brother-in-law (Bill) and a 92 year old frail father (Ray) Friendly Beds® was created- an integrated heavy duty system of mobility, safety and comfort components all designed to work together to allow greater independence and quality of life to those in need of assistance. In fact, the Model FB prototype was used by my father and it was the only thing that allowed him to stay at home with my 88 year old mother who had back and shoulder problems. She surely would have injured herself with turning him over, etc.- with the prototype he was 100% independent in the bed area.
