

Western Suburbs Veterinary Clinic

“Your Caring Townsville Vet”

Western Suburbs Vet Clinic offers a puppy preschool course for puppies 14 weeks and under. The course runs for four weeks. Each class runs for an hour once a week and is usually held between 6:30pm and 7:30pm at the clinic. Puppies are required to have had a minimum of one vaccination and be up to date with worming and parasite preventatives.

The classes are small with a maximum of five puppies to ensure a safe and controlled environment for pups to interact, play, and learn. Puppies will be introduced to common training cues including sit, stay, leave it, loose leash walking, and recall. There are also plenty of opportunities to explore, make friends and gain confidence.

Long-lasting chews/treats will be provided at every class, and there will be a complimentary puppy pack once the course concludes. You will need to bring your puppy on a harness or flat collar with a leash as well as treats for training. The course uses positive reinforcement methods for training and creates a foundation for happy, confident puppies whilst strengthening bonds between puppies and owners.

Please call the clinic to book.
