

## International RT Month Greeting

How inspiring it is that practitioners around the world—whether known as Therapeutic Recreation, Recreational Therapy, Activity Provision, or Diversional Therapy—share the same purpose and philosophy, and are able to connect and empathize across borders.

Although cultures and policy systems differ from country to country, as therapists and as human beings, we find deep happiness in respecting each person's dignity and pride, and in supporting their enjoyment and unique lifestyle throughout the entirety of their life.

May people everywhere be able to live their lives with pride, joy, and a sense of meaning until the very end.

*Takako Serizawa*

**President**

*Diversional Therapy Association of Japan*
