

THE BRYANT SMART THERMOSTAT FEATURING INTELISENSE™

Our New Smart Thermostat with an Even Smarter Connection

Residential contractors need a reliable smart thermostat that's cost effective, meets homeowner needs, and quickly drives connectivity. The new Bryant Smart Thermostat featuring IntelliSense checks all those boxes. Built to offer a smartphone feel to the consumer, this 24V programmable thermostat via the Bryant SmartHome app, is compatible with most third-party Smart Home assistants and provides an intuitive user experience.

For the contractor, our thermostat offers an affordable price point and ease of installation and service. The new Bryant Smart Thermostat is built for simple wiring and installation, and the Bryant Service Tech app allows technicians to easily connect, configure, and test the thermostat.

When paired with the Preferred™ 249VAN variable-speed heat pump, the new Bryant Smart Thermostat has the ability to send over-the-air equipment updates.** Keeping the homeowner's system software up-to-date helps ensure top performance and may potentially minimize service calls. This pairing also unlocks the heat pump's PerfectAdjust™ feature allowing for more precise variable-speed operation.

Lastly, when paired with IntelliSense-enabled equipment, and with homeowner permissions granted to data sharing, contractors have the ability to remotely view the operational health of their customer's system via our digital tools to provide more efficient servicing.

Model TSTATBBIEWF-01*

Homeowner Benefits

Offering homeowners the new Bryant Smart Thermostat featuring IntelliSense is good business. That's because this thermostat provides all the benefits that homeowners are looking for at a reasonable cost.

ENHANCED COMFORT

Unlocks our patent-pending PerfectAdjust™ feature that optimizes system performance of select Bryant equipment to enhance temperature and humidity control.

OVER-THE-AIR EQUIPMENT UPDATES

This thermostat is capable of updating itself and select Bryant equipment.** When a new firmware version is made available, it's simply pushed out to the thermostat.

SMARTER SERVICE

Your Bryant contractor can gather system data from the Smart Thermostat and equipment to provide quicker, more efficient service.

VISUAL CUE AT STARTUP

Confirm system startup with just a glance – heating, cooling and fan operation are signaled by an illuminated LED border around the screen.

CONNECT WITH EASE

The Bryant SmartHome app with guided setup makes a fast and easy connection to your Smart Thermostat.

PERSONALIZED COMFORT

Set daily comfort schedules and adjust home temperatures from anywhere using the Bryant SmartHome app.

SMART HOME READY

Scan the Smart Home QR code on the back of the thermostat to connect with most third-party Smart Home systems.

MAGNETIC APPEAL

Snap your Smart Thermostat in place with ease and enjoy the sleek, minimalist, patent-pending design.
