Carrier Channel Marketing

Kearsten Huddleston| Sr Channel Manager

March 1, 2024

2024 CHANNEL MARKETING STRATEGY

Elevate partnerships and support for the channel:

- Puron advance
- IntelliSense & DLS Crossover
- Women in HVACR

Brand Awareness

- Lean into Millennial Audience
- Focus on Sustainability
- Utilize Multi-Faceted Executions

Advertising Alignment

- Webinars
- New Ad Kit Assets
 - B-Roll
- CFAD Dealers advertising campaign

Provide exceptional support tools and educational content that present Carrier brand as best-in class

DEALER PLAYBOOK 2.0

What's New

New regulations and constant innovations make 2024 a big year.

The landscape is always changing the world of HVAC, and this year is shaping up to be no exception. We're excited about the fact that we're not just responding to regulatory changes to refrigerant - we're innovating our way to being the first compliant brand in the industry.

We're also proud to bring you products and support that will set you apart from your competition. Because at the end of the day, it's all about giving you what you need to succeed.

Carrier Crossover Solutions

Seamlessly blending ductless technology with traditional HVAC ducts, furnaces and fan coils has never been easier. Learn more about our energy-efficient, versatile solutions for residential and light commercial spaces here.

Heat Pumps

Once thought of as a solution for a small group of homeowners, heat pumps are now one of the fastest-growing types of heating and cooling systems in our industry. To help your customers better understand heat pumps, we've created a video series that answers the five most-searched questions about heat pumps. You can watch them here (and share them with your customers).

IntelliSense™

Servicing is now smarter, faster and more efficient thanks to IntelliSense™ technology. With your customer's opt-in permissions, you can troubleshoot, diagnose and possibly even correct an issue without even stepping foot inside their home. Available on Carrier Performance™ Series systems, IntelliSense is the industry's first single-stage and two-stage connected system via standard 24V wiring, with enhanced data collection accessible through the connected portal and the Service Tech app.

Puron ADVANCE™

A new refrigerant for a better future

Puron Advance™

We're focused on providing a refrigerant that offers a higher efficiency and the lowest GWP that will positively impact people, our planet and our communities. That's why we've gone beyond the regulatory minimums and created a long-term solution that will truly improve our industry. Switching to Puron Advance will be easy for you and technicians because it operates at the same temperatures and pressures as our current refrigerant, Puron. For more information on Puron Advance, [click here.](#)

YOU SPOKE

We've spent the last year connecting with dealers like you to find out what you need to make your business a success. Here's what we've been hearing

Since Carrier is such a strong brand,

we can leverage that because it's so well known

I mean, the pictures are great. Obviously we like to have that for print, but I would think getting more into the digital and your videos kind of like your explanations of how these things work

We need B-roll. We need B-roll bad.

Pictures. Stuff we can insert quickly, easily

Heat pumps have really taken off for us, which is, was our goal.

I would say 90% of our installs right now are heat pumps

COOL CASH SPRING 2024

March 4 – May 31, 2024

Claiming period is 4 weeks from sale date

Advertising on the consumer site

Increases to Infinity System rebates

- \$1700 Infinity with Greenspeed
- \$1400 Infinity
- Controller is required/not rebated separate from the System
- Infinity with Greenspeed Intelligence will no longer be rebated as an individual unit (e.g. sold as system only)
- Non-Greenspeed Infinity will be eligible for unit rebates

WELLS FARGO FINANCING

- New rate sheet, with lower rates added to HVACPartners. Effective through August 31
- EcoHome FAD financing program will continue
- September 1 next effective rate date

2024 UPDATES

FAD Training Deadline Changes

Complete by December 15

Hours completed 12/16-12/31 will not carry over to 2025 or count for 2024

Failure to complete hours by 12/15 will result in FAD removal

FAD Scorecard Changes

New Bonus:
Dispatch and Connect
portal engagement

RC Parts moving to
regular metric

Training

- No prerequisite course for 2024
- Extra points for passing A2L courses
- Points for completing training by 10/31

Minimum Scorecard Required to win

Increased to 775

PERSONAL USE PROGRAM: R-454B

- Dealers can install R-454B equipment in their home, training area, or office starting in 2024!
- Entry and mid-tier product available in PUP for a limited time

CONSUMER CHOICE

New Carrier warranty program launching April 2024

Provides homeowner with a choice of factory warranty options
on eligible equipment

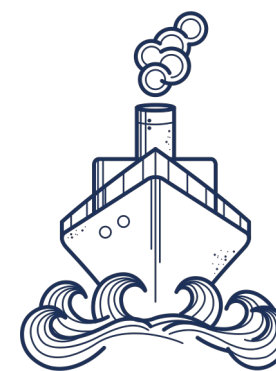

10-year parts only

OR

5-year parts + 3-yr labor

Selected at time of registration on eligible equipment with timely
registration
