⚠ Quick Scan

- Assess your home's top fall risks in under 5 minutes.

Section: THE BATHROOM SANCTUARY (High Risk Area) and The Solution

1. Shower/Tub Entry Height (Is it over 3 inches high?)
 - [Low-Curb/Curbless Walk-In Shower](#)
2. Slippery Floor (Do tile/grout feel slick when wet?)
 - [Non-Slip Porcelain Tile](#)
3. Wall Support (Is blocking installed for future grab bars?)
 - [Safety Blocking installed inside the wall](#)
4. Access Space (Can a chair roll under the sink/vanity?)
 - [Floating or Pedestal Vanity Design](#)
5. Low Toilet (Is the seat height below 16-17 inches?)
 - [Comfort-Height Toilet Upgrade](#)
6. Water Temperature (Does hot water reach unsafe temps?)
 - [Anti-Scald Pressure-Balanced Faucets](#)

Section: GENERAL MOBILITY and The Solution

7. Door Widths (Are doors less than 36" inches wide?)
 - Wider Doors or Pocket Doors that are 36 inches wide.
8. Loose Rugs/Cords (Are there unanchored tripping hazards?)
 - Remove/Secure all loose rugs immediately
9. Hallway Lighting (Are pathways dim or shadowed at night?)
 - High-Output LED and Sensor Lighting
10. Stair Handrails (Are they loose, uneven, or missing?)
 - Secure, Continuous Handrail Installation
