- ⊕ Construction Support

Why Choose Us

- ✓ Founded on the principles of uncompromising quality, operational efficiency, and cost-effectiveness, HM Precision Engineering Pty Ltd prides itself on maintaining a personable and client-focused approach at all times.
- ✓ Relationships are paramount in all aspects of our business, with an unwavering mission of success, driven by integrity, collaboration, and a commitment to delivering lasting value for our clients and communities.
- ✓ Ongoing precision, improvement, accountability and shared success define everything we do and everything we believe in as a company.
- ✓ We are constantly driven by the challenges we sign up for and are serious about changing the landscape of project delivery to drive results to the satisfaction of our clients.
- ✓ While we strive for excellence, we also place great importance on fostering a positive and enjoyable work environment as the energy of the team is visible in the work we deliver.

OUR TEAM

HM Precision Engineering is spearheaded by Directors Angus Munro and Jed Harrison, who collectively bring a comprehensive blend of technical expertise and strategic project management skills

ANGUS MUNRO

Director

B.Eng (Civ), RPEQ, RPEng

As a Registered Professional Engineer of Queensland (RPEQ), Angus has extensive experience working collaboratively with both clients and delivery teams across a broad range of infrastructure projects. His background in the construction industry spans the utilities, transport, events, mining, industrial, commercial, and local government sectors.

Over the course of his career, Angus has been involved in successful planning, design, delivery, and commissioning of critical water and wastewater infrastructure, including sewer and water mains, sewer pump stations, and wastewater treatment plants.

His practical knowledge and strategic insight enable him to contribute across all phases of a project lifecycle, from concept through to delivery and operational handover.

JED HARRISON

Director

B.Eng (Civ)(Hons), RPEQ, RPEng

Jed is a Senior Civil Engineer (RPEQ) and Project Manager with 8 years of industry experience delivering a variety of complex water and wastewater infrastructure projects.

Jed brings proven expertise in managing end-to-end design and construction projects, underpinned by a strong construction background that enables him to develop

practical, site-ready solutions. He maintains a strong focus on stakeholder engagement, technical leadership, and program delivery.

He has a proven track record of successfully delivering a wide range of civil and pipelaying projects, including water and sewer main installations, pump stations, and treatment plants. Jed has been consistently recognised for high performance, technical proficiency, and commitment to quality outcomes.
