

— Moon Mountain —

Right at the entrance, at the lake with the fields and the oak park,
when you drive through, that's four acres in there and it's flat and deep
soil and that's why those big trees grow. It would have made a hell of a
vineyard, but for me that big eucalyptus tree and those four acres of park
and that lake, listening to the frogs at night in the spring and walking up
through there. That quality of land is something that's unbelievable,
and I still see it when I drive in.
