DECEMBER 2025 - SWEET CHESTNUT & OAK FOR HELMINGHAM
'HARRY BEDS' – MOBILE RAISED BEDS

- We continue to produce about 2,000 trees for the local community.
- Most of these going for large plantings:
- E.g. Wenhaston - 800+ trees planted on agricultural land supported by 'Wilder Wenhaston' volunteers.
- E.g. Helmingham – added trees to the historic deer park. 'cactus' guarded & stapled to posts against deer. Multi species to add greater diversity to this Ancient Oak Parkland.
- Replaced trees in 30ha Agroforestry; damaged by large herds of Fallow.
- New Woodland & Hedgerows for local landscape – e.g. x2 plantations in Sweffling, etc
- Hosted x2 Tree Warden 'giveaway' days. Wonderful trees from our Tree Wardens.
- 'Rescued' many trees from large contract plantings. Local Ecologist involved in 'environmental impact', brought several loads of trees, un-planted by local landscape projects, for us to care for & distribute.
- x2 grafting workshops and x2 'Pruning Traditional Fruit Trees'. A good way to meet other Tree Wardens and those involved with trees in several ways. We are very grateful to Paul Read & Celia Stone, our Tutors, who willingly share their expertise and knowledge.
- Thanks to all our Tree Wardens and local volunteers who support the care of trees.
