2027 Access Formulary

Effective 1/1/2027

The Access Formulary List is a guide providing tier designations for common medications within select therapeutic categories. Inclusion of a drug on this Access Formulary List **does not** guarantee coverage under your prescription drug benefit plan. A drug listed on the Access Formulary List may not be covered under your specific benefit plan, or may be subject to coverage requirements, limitations, or restrictions, such as prior authorization, step therapy, quantity limits, specialty pharmacy requirements, or other clinical or benefit-management programs. For specific information regarding coverage, applicable restrictions, and member cost-sharing with respect to a particular medication, please contact the TrueScripts Member Care Team at 844-257-1955. Generic medications are available within many of the therapeutic categories listed, as well as categories not listed, and should be considered as the first line of prescribing.

This Access Formulary List is revised periodically as new drugs, generic alternatives, prescribing information, and other relevant information become available. Formulary status, tier designation, coverage requirements, and the pharmacy network may change. Your benefits are at all times subject to the provisions of your benefit plan document(s). It is recommended that you bring this list of medications when you or a covered family member sees a physician or other healthcare provider.

Tier Definitions	Description	Helpful tips
Tier 1	This tier includes many commonly prescribed generic drugs and may include other lower cost drugs.	Use Tier 1 drugs for the lowest out-of-pocket cost.
Tier 2	This tier includes preferred brand name drugs as well as some generic drugs.	Tier 2 drugs will generally have a lower out-of-pocket cost than Tier 3 drugs.
Tier 3	This tier includes non-preferred brand name drugs as well as some generic drugs.	Tier 3 drugs generally have the highest out-of-pocket cost. Ask your doctor if switching to an alternative drug from Tier 1 or Tier 2 may be right for you.

Notes: ST = Step Therapy, PA = Requires Prior Authorization (subject to plan benefit coverage)

Specialty Drug - **all** Specialty Drugs require Prior Authorization (PA). If approved, Specialty Drugs will process at plan defined Specialty Tiers (not Tier 1, 2, or 3) as defined under Schedule of Benefits per Person in your benefit plan document(s).
